Established in 1974 by Cushing N. Dolbeare, the National Low Income Housing Coalition is dedicated solely to achieving socially just public policy that assures people with the lowest incomes in the United States have affordable and decent homes. NLIHC educates, organizes and advocates to ensure decent, affordable housing within healthy neighborhoods for everyone.

NLIHC provides up-to-date information, formulates policy, and educates the public on housing needs and the strategies for solutions. Additional copies of *Out of Reach* are available from NLIHC. *Out of Reach* and additional data are available on NLIHC's website at www.nlihc.org/oor/2012.

Permission to reprint portions of this report or the data therein is granted, provided appropriate credit is given to the National Low Income Housing Coalition. The data for nonmetro areas included in *Out of Reach* are published in collaboration with the Housing Assistance Council (www.ruralhome.org).

PREFACE

By Shaun Donovan | Secretary of the U.S. Department of Housing and Urban Development

For decades, having a decent, safe place to call home has been a cornerstone of opportunity in America – a place where we can raise our families, connect to our communities, and pursue opportunities for a better life for ourselves and our children. But as the National Low Income Housing Coalition shows with this report, for too many Americans that opportunity is out of reach, as families confront a wide gap between the cost of housing and their ability to pay for it.

And in the wake of the worst economic downturn since the Great Depression, that gap has only grown. We all know the devastating effect this crisis has had on our most vulnerable families and communities. This was confirmed by the results of HUD's *Worst Case Housing Needs Survey*, which showed an increase of 20 percent in worst case needs between 2007 and 2009, the largest increase in the survey's history.

But as this year's *Out of Reach* report demonstrates, the crisis has had an even more profound impact in certain markets. In rural areas and other places with high rates of unemployment, depressed incomes have widened the affordability gap. Conversely, regions with stronger economies are also feeling the pinch – as foreclosures throw more families into the rental market and drive up rates in communities that traditionally have less rental housing.

This perfect storm of growing need and rising costs is why it is more important than ever that we provide a supply of affordable rental homes at the scale that families require and in the places that need them.

That's why, through the Recovery Act, the Obama Administration invested \$4 billion to make urgent public housing repairs and prevented or ended homelessness for more than 1.2 million people. And by saving the Low Income Housing Tax Credit, it preserved a critical tool to relieve pressure on the rental market more broadly.

Collectively, these steps and others have not only allowed HUD to increase the number of families served each year since 2009 – perhaps more importantly, they have helped put the Federal government is back in the affordable housing business.

Still, given that we have lost 150,000 homes from our nation's affordable housing stock in the last 15 years—and the estimated \$26 billion capital needs backlog facing our public housing program—the job isn't done.

That's why I'm proud HUD's proposed FY13 budget makes renewing rental assistance for over 5.4 million families our top priority. Even in a tough budget year, it protects families that were hardest hit by the recession and maintains our commitment to the core rental programs that serve them. And at the same time we will be testing new strategies to preserve publicly-owned homes for future generations through our Rental Assistance Demonstration, the budget also requests \$1 billion for the National Affordable Housing Trust Fund to provide the consistent, flexible, and transparent funding we need to build more affordable housing. Together, these efforts will build or preserve more than 70,000 affordable rental homes.

Tools like these represent important progress in the fight to ensure that vulnerable families have access to quality housing they can afford. And as this report shows us, we have a long way to go before we can reach that goal. But with the help of partners like NLIHC, we can preserve, improve and expand access to quality affordable housing – and put the dream of a safe, decent home within reach for every American who needs it.

**IT IS MORE
IMPORTANT
THAN EVER THAT
WE PROVIDE A SUPPLY
OF AFFORDABLE RENTAL
HOMES AT THE SCALE
THAT FAMILIES REQUIRE
AND IN THE PLACES
THAT NEED THEM.**

INTRODUCTION

Although the recession may have temporarily stalled the rising cost of housing in the United States, it did not result in increased access to affordable rental housing for households that need it most: extremely low income families facing the greatest housing cost burden. As demand flooded the rental market over the past year, indicated by the vacancy rate dropping to the lowest level since 2001, rental costs have begun to inch up, impacting those households already most vulnerable to price fluctuations.¹ The rental market is expected to continue to heat up, with more moderate income households choosing to rent, making even fewer housing options available to low income renters.

WHAT IS THE GAP BETWEEN THE ESTIMATED HOURLY WAGE NECESSARY TO AFFORD A TWO-BEDROOM APARTMENT AND THE WAGE AN AVERAGE AMERICAN RENTER ACTUALLY EARN?

The Housing Wage is an estimate of the full-time hourly wage a household must earn in order to afford a decent apartment at the HUD estimated Fair Market Rent (FMR) while spending no more than 30% of income on housing costs. Nationally, the average two-bedroom FMR for 2012 is \$949. Accordingly, the 2012 Housing Wage is \$18.25, significantly surpassing the \$14.15 hourly wage actually earned by renters, on average, nationally. The gap between the Housing Wage and the average renter wage is an indicator of the magnitude of need for more affordable rental units. In 2012, in 86% of counties studied nationwide, the housing wage exceeds the average hourly wage earned by renters.

In spite of this bleak picture, it is possible to work towards bridging the gap between wages and housing costs. Policies that support expanding the supply of affordable housing, targeted to the lowest income households, are an important step toward providing more households access to decent housing.

By the fourth quarter of 2011, the homeownership rate dropped to 66%, the lowest since 1998, reflecting caution among prospective homeowners. Over the past four years, renter household growth has consistently surpassed owner household growth.² It is estimated that the number of renter households rose by nearly 4 million between 2005 and 2010. Over the next decade, the number of renters may increase by upwards of 470,000 annually, further straining the rental market and disproportionately affecting extremely low income households.³

Among renter households, the number of extremely low income renters, those earning 30% or less of the Area Median Income (AMI), jumped by nearly 900,000 in the years between 2007 and 2010.⁴ Extremely low income (ELI) renters, competing with an ever-growing number of households in search of decent, safe and affordable rental units, face a tightening market with fewer and fewer options. With the recent surge in demand, the need for affordable rental units has never been greater.

Out of Reach 2012 clearly shows that this need cuts across all parts of the country by fusing housing cost data with wage data at the national, state, metro, and county levels. The analysis illustrates a wide gap between the cost of decent housing and the hourly wages that renters actually earn. The numbers in *Out of Reach* demonstrate that this year, in every community across the country, there are renters working full-time who are unable to afford the rents where they live.

DEFINITIONS

Affordability in this report is consistent with the federal standard that no more than 30% of a household's gross income should be spent on gross housing costs. Households paying over 30% of their income are considered cost burdened. Households paying over 50% of their income are considered severely cost burdened.

Area Median Income (AMI) is used to determine income eligibility for affordable housing programs. Area Median Income is set according to family size and varies by region.

Extremely Low Income (ELI) refers to earning less than 30% of AMI

Housing Wage is the estimated full-time hourly wage a household must earn to afford a decent rental unit at HUD estimated Fair Market Rent while spending no more than 30% of their income on housing costs.

Full-Time Work is defined as 2,080 hours per year (40 hours each week for 52 weeks). The average employee works roughly 34.5 hours per week, according to the Bureau of Labor Statistics.

Fair Market Rent (FMR) is the 40th percentile of gross rents for typical, non-substandard rental units. FMRs are determined by HUD on an annual basis, and reflect the cost of shelter and utilities. FMRs are used to determine payment standards for the Housing Choice Voucher program and Section 8 contracts.

Renter Wage is the estimated hourly wage among renters by region, based on 2010 Bureau of Labor Statistics data, adjusted using the ratio of renter income to the overall household income reported in the ACS and projected to April 1, 2012.

⁴ NLIHC tabulations of 2007, 2010 ACS PUMS data.

EXTREMELY LOW INCOME HOUSEHOLDS FACE THE GREATEST HOUSING NEED

By 2010, the number of ELI renter households rose to 9.8 million, accounting for one out of every four renter households. ELI renter households face a tough rental market: for every 100 such households seeking an apartment, only 30 units both affordable and available can be found.⁵ In sum, 6.8 million additional units are required to address the need for affordable housing among ELI households.⁶

Despite the immense need, the supply of low-cost rental units is actually shrinking, as more units are converted to serve higher income tenants or fall into disrepair. According to recent ACS data, the number of units renting for \$500 or less fell by one million from 2007 to 2010, and during that same time period, the number of units renting at \$1,250 or more grew by two million units.⁷

1 out of 4 RENTER HOUSEHOLDS IS ELI. BUT DESPITE THE IMMENSE NEED, THE SUPPLY OF LOW-COST RENTAL UNITS IS ACTUALLY SHRINKING.

Roughly 8 million individuals receive Supplemental Security Income (SSI) because they are elderly, blind or disabled and have few economic resources.⁸ With the maximum federal monthly payment of \$698 in 2012, *Out of Reach* estimates that an SSI recipient can afford rent of only \$209.⁹ SSI is the only source of income for 57% of all recipients.¹⁰ Among those reliant on SSI, there is not a single county in the U.S. where even a modest efficiency apartment, priced according to the FMR, is affordable. By 2010, an estimated 46.2 million people lived in poverty in the United States, the largest poverty estimate since the Census began to quantify the indicator over fifty years ago.¹¹ With the number of American households living in poverty on the rise, it is likely that the need for affordable housing, especially among the lowest income households, will continue to grow.

Year after year, *Out of Reach* data show that for many extremely low income Americans, including seniors on fixed incomes and the disabled, a decent apartment remains incredibly difficult to find.

This year's edition of *Out of Reach* underscores the great need for additional affordable housing among ELI households. In 2012, the average ELI household will earn roughly \$20,210 and can afford to spend no more than \$505 on rent. Yet, this year, the national two-bedroom FMR is \$949, and the one-bedroom FMR is \$797, both far more than the rent ELI households are able to pay.

Among ELI households, those relying on fixed incomes face the most limited housing choices.

WHAT TYPE OF RENTAL UNIT CAN VULNERABLE HOUSEHOLDS AFFORD?

WAGES REMAIN INSUFFICIENT TO COVER RENTS

While economic indicators have shown signs of growth since mid-2009, opportunities for economic gains for low income workers have been stunted by the effects of the Great Recession. Recent analysis of Census data found that families in the bottom fifth of the income distribution scale saw their incomes decline significantly during the recession, by 11.3% between 2007 and 2010, while the top fifth only saw losses of 4.5%.¹² The poor have been hit the hardest by the economic downturn, and continue to struggle to recover from the financial setbacks of this period.

As of November of 2011, retail was leading the way in terms of job openings.¹³ Low income service sector workers, including those earning the minimum wage, compose a sizeable portion of the nation's 9.8 million extremely low income renters. Minimum wage workers, according to federal law, earned \$7.25 per hour for 2012. Eighteen states and D.C. have established minimum wage rates above the federal level. Eight states increased their minimum wage effective January 1, 2012 due to adjustments based on the cost of living index. And San Francisco became the first city in the nation to have a minimum wage of above \$10 an hour, as of 2012.

Despite this progress, the number of full-time jobs that a household must work at the prevailing state minimum wage to afford the average two-bedroom FMR ranges from 1.3 jobs (Puerto Rico) to 4.4 jobs (Hawaii). In other words, in no state can an individual working full-time at the minimum wage afford a two-bedroom apartment for his or her family. Overall, there are very few places in the U.S. where even a one-bedroom unit at the FMR is affordable to someone working full-time at the minimum wage.

According to analysis from the Economic Policy Institute, 78% of minimum wage workers work at least 20 hours per week and 80% are at least 20 years old, dispelling the myth that the majority of minimum wage workers are teenagers working part-time after school.¹⁴ Minimum wage workers are especially vulnerable to the rising cost of rental housing as their wages remain stagnant and insufficient to cover their basic needs.

AFFORDABILITY IS A NATIONAL CONCERN

Housing costs vary across the nation, but uniformly, low income households are likely to face a grueling search for affordable housing with few decent options available to them. Nationally, the Housing Wage is highest in Hawaii, where costs of land development and building materials drive up the cost of housing. California and the highly urbanized Northeast corridor between Boston and Washington, D.C. also are home to communities with extremely high housing wages.

Yet, the lack of affordable housing is not an issue constrained to high-cost, urbanized regions. In fact, according to *Out of Reach* calculations, a worker earning the renter wage is unable to afford a two-bedroom unit in nearly every state, unless they pick up extra hours by cobbling together several jobs. In 28 states, the one-bedroom FMR exceeds the rent affordable to the average renter. And, in all but one state (WY), the two-bedroom FMR exceeds the rent affordable to the average renter.

FOR A FULL-TIME INDIVIDUAL EARNING THE RENTER WAGE, A TWO-BEDROOM UNIT IS UNAFFORDABLE IN NEARLY EVERY STATE.

For each state, *Out of Reach* combines data for counties outside metropolitan areas and calculates the Housing Wage for these rural communities. Our findings this year demonstrate that while housing costs are lower in rural areas, these areas also generally have lower wages than metropolitan areas. To illustrate, *Out of Reach 2012* indicates that the Housing Wage, on average across nonmetropolitan America, is \$12.21, still exceeding the nonmetropolitan renter wage of \$9.87. At the state level, the nonmetropolitan two-bedroom Housing Wage exceeds the renter wage in all but five states.

Low income renters continue to struggle to overcome poverty and limited economic opportunities, while facing rents that are likely to rise in the coming years as demand grows. In both rural and urbanized America, more renters are not making ends meet: over half of all renters (53%) are cost burdened, paying over 30% of their income for housing.¹⁵ Only 25% of renters faced such a burden in 1960.¹⁶ And, of course, this issue affects the lowest income families more severely than others. Seventy-six percent of ELI renter households spend more than 50% of their income on housing costs, or have a severe housing cost burden.¹⁷ The rising incidence of housing cost burdens among renters makes evident the urgent need for expanding the supply of affordable housing.

AFFORDABLE HOUSING IS A BASIC HUMAN NEED.

MEETING THE NEEDS OF LOW INCOME AMERICANS FOR MORE AVAILABLE AND AFFORDABLE HOUSING SHOULD THEREFORE BE A TOP PUBLIC POLICY PRIORITY.

CONCLUSIONS

This year, as in years past, *Out of Reach* speaks to a fundamental truth: a mismatch exists between the cost of living, the availability of rental assistance and the wages people earn day to day across the country.

With the number of low income renters on the rise, the argument for sustaining affordable housing assistance is timely.

- In 2012, a household must earn the equivalent of \$37,960 in annual income to afford the national average two-bedroom FMR of \$949 per month.¹⁸
- Assuming full-time, year-round employment, this translates into a national Housing Wage of \$18.25 in 2012.
- This year the housing wage exceeds the average renter wage, \$14.15, by over four dollars and is nearly three times the minimum wage.

Despite the great need for affordable housing units, subsidies for critical affordable housing programs continue to face the threat of cuts, as do many social safety net programs. For FY12, HUD suffered cuts of \$3.7 billion dollars, 9% below FY11 funding levels. Although HUD estimates that its public housing capital needs are in excess of \$25 billion, the Public Housing Capital Fund received 8% lower funding for FY12.¹⁹ The HOME program, key to the production of many new affordable units at the local level, suffered a cut of 38% between FY11 and FY12, a cut that is estimated to result in 31,000 fewer affordable rental homes. Meanwhile, the National Housing Trust Fund (NHTF), which Congress authorized in 2008, remains unfunded. The NHTF would fund the production and preservation of homes affordable to the lowest income households. Funding the NHTF is NLIHC's top priority.

An affordable home, providing stability and shelter, is a basic human need. Expanding the availability of affordable housing to address the unmet need of so many low income Americans should be a top public policy priority.

THE NUMBERS IN THIS REPORT

As in past years, *Out of Reach 2012* relies on data from HUD, the U.S. Census Bureau, the Bureau of Labor Statistics, the Department of Labor, and the Social Security Administration to make its case. See Appendix A for a detailed explanation of data sources and methodologies.

The FMR on which the Housing Wage is based is HUD's best estimate of what a household seeking a modest rental unit in a short amount of time can expect to pay for **rent and utilities** in the current market. Thus, the FMR is an estimate of what a family moving today can expect to pay for a modest rental home, *not* what current renters are paying *on average*. See Appendix B for information on how HUD calculates the FMR.

Readers are cautioned against comparing statistics in one edition of *Out of Reach* with those in another. In recent years, HUD has changed its methodology for calculating FMRs and incomes. In 2012, the FMR estimates were developed using American Community Survey (ACS) data as base rents, rather than data from the Decennial Survey. The new methodology is thought to be an improvement on past practices, but it can introduce more year-to-year variability into the data. For this reason and others (e.g., changes to the metropolitan area definitions), readers should not compare this year's data to previous editions of *Out of Reach* and assume that differences reflect actual market dynamics. Please consult the appendices and NLIHC research staff for assistance interpreting changes in the data.

The data in this report and the additional materials and data can be found online at: **WWW.NLIHC.ORG/OOR/2012**

¹⁸ The data contained in this printed version are supplemented by additional data online, such as the Housing Wages for an array of apartment sizes (0-4 bedrooms).

¹⁹ NLIHC. (2012, November 18). "Final FY12 budget cuts HUD, rural housing programs". *Memo to Members*. Washington, D.C.: Author. Retrieved from: http://nlihc.org/detail/article.cfm?article_id=8308

WHERE THE NUMBERS COME FROM

<div>Divide income needed to afford FMR (\$37,960) by 52 (weeks per year) and then by 40 (hours per work week) (\$37,960 / 52 = \$730; \$730 / 40 = \$18.25).</div>		<div>Multiply Annual AMI by .3 to get maximum amount that can be spent on housing for it to be affordable (\$67,367 x .3 = \$20,210). Divide by 12 to obtain monthly amount (\$20,210 / 12 = \$1,684).</div>			<div>Divide number of renter households by total number of households (ACS 2006-2010) (38,481,257 / 115,455,179 = .33). Then multiply by 100 (.33 x 100 = 33%).</div>			<div>Average wage reported by the Bureau of Labor Statistics (BLS) for 2010, adjusted to reflect the income of renter households relative to all households in the United States, and projected to April 1, 2012. See Appendix A.</div>						
FY 12 HOUSING WAGE		HOUSING COSTS			AREA MEDIAN INCOME (AMI)				RENTER HOUSEHOLDS		Full-time jobs at mean renter wage needed to afford 2 BR FMR			
Hourly wage necessary to afford 2 BR		Two-bedroom FMR (2012) ¹	Income needed to afford 2 BR FMR	Full-time jobs at minimum wage needed to afford 2 BR FMR	Annual AMI (2012) ²	Rent affordable at AMI ³	30% of AMI ⁴	Rent affordable at 30% of AMI	Number (2006-2010)	% of total household		Estimated mean renter hourly wage ⁵	Rent affordable at mean wage

¹ Excludes the District of Columbia.

² Excludes metropolitan counties in New England.

³ HMFA = HUD Metro FMR Area. This term indicates that a portion of the Office of Management and Budget (OMB) defined core-based statistical area is in the area to which the income limits and FMRs apply. HUD is required by OMB to alter the name of the metropolitan geographic entities it derives from the Core Based Statistical Area (CBSA) when the geography is not the same as that established by OMB. CBSA is a collective term meaning both metro and micro areas.

⁴ MSA = Metropolitan Statistical Area. Geographic entities defined by OMB for use by the Federal statistical agencies in collecting, tabulating and publishing Federal statistics. A metro area contains an urban core of 50,000 or more in population.

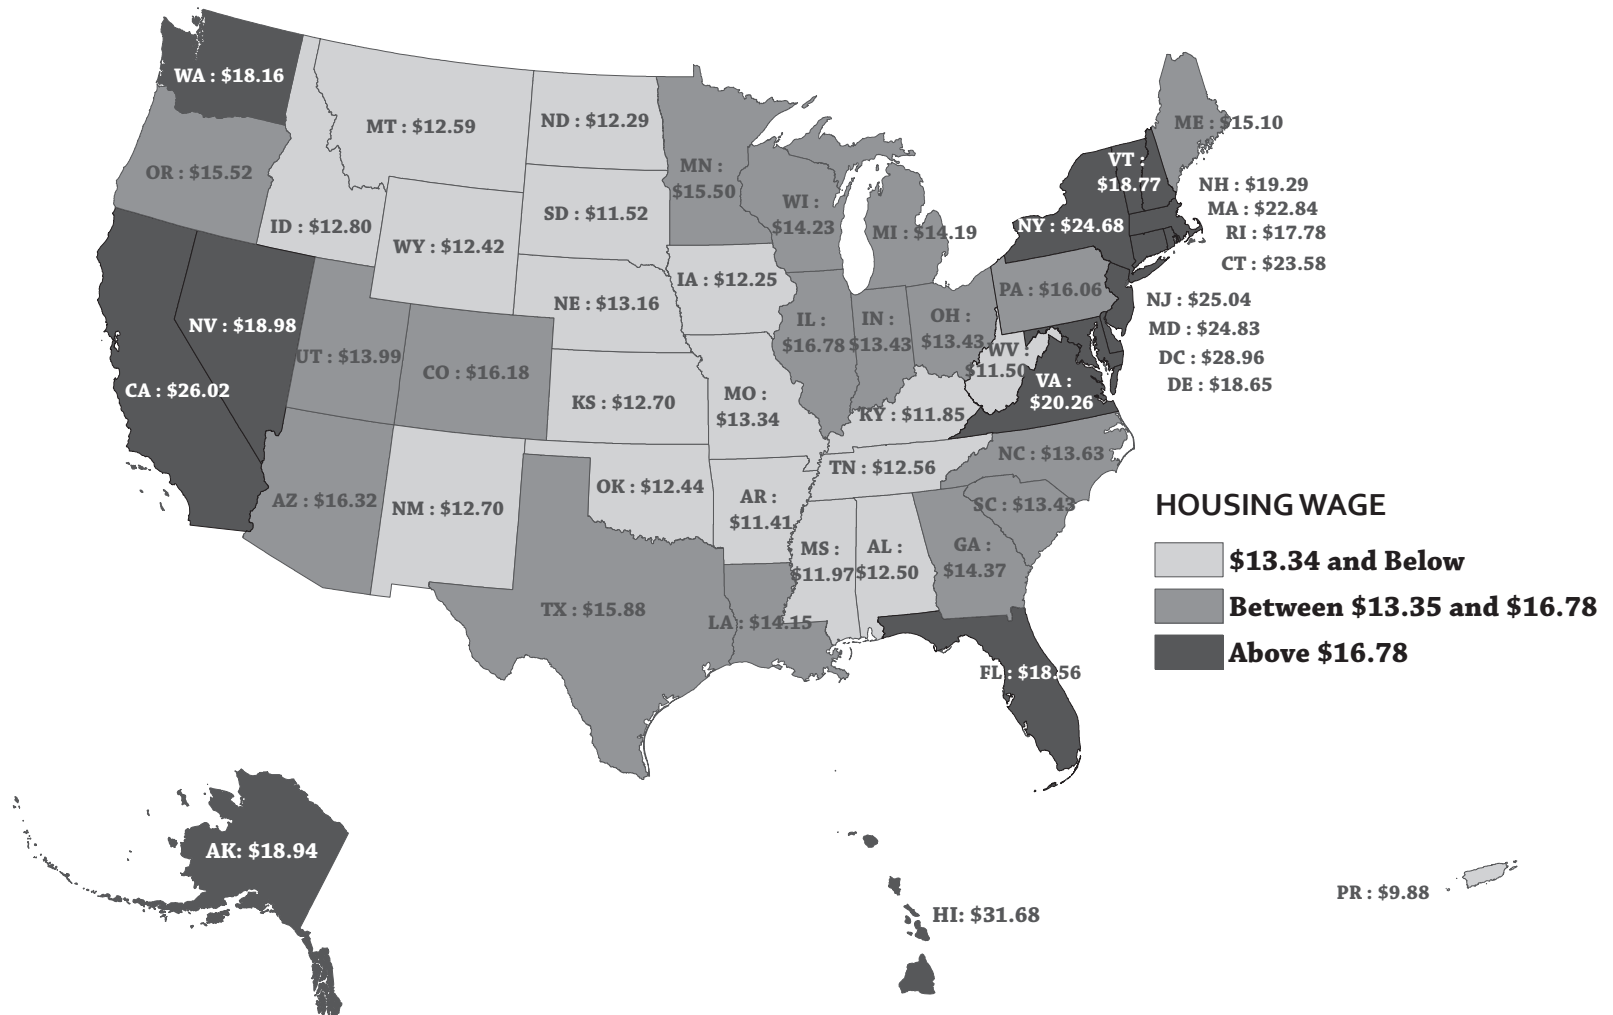

STATES RANKED BY TWO-BEDROOM HOUSING WAGE

Represents the hourly wage that a household must earn (working 40 hours a week, 52 weeks a year) in order to afford the Fair Market Rent for a two-bedroom unit at 30% of income.

HOURS AT MINIMUM WAGE NEEDED TO AFFORD RENT

In no state can a minimum wage worker afford a two-bedroom unit at Fair Market Rent, working a standard 40-hour work week.

¹ FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011).

² AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

³ "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs.

⁴ The federal standard for extremely low income households. Does not include HUD-specific adjustments.

Alabama

In Alabama, the Fair Market Rent (FMR) for a two-bedroom apartment is \$650. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,166 monthly or \$25,995 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$12.50

In Alabama, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 69 hours per week, 52 weeks per year. Or a household must include 1.7 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Alabama, the estimated mean (average) wage for a renter is \$10.88. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 46 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.1 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

Alaska

In Alaska, the Fair Market Rent (FMR) for a two-bedroom apartment is \$985. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$3,283 monthly or \$39,399 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$18.94

In Alaska, a minimum wage worker earns an hourly wage of \$7.75. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 98 hours per week, 52 weeks per year. Or a household must include 2.4 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Alaska, the estimated mean (average) wage for a renter is \$16.07. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 47 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Arizona

In Arizona, the Fair Market Rent (FMR) for a two-bedroom apartment is \$849. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,829 monthly or \$33,953 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$16.32

In Arizona, a minimum wage worker earns an hourly wage of \$7.65. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 85 hours per week, 52 weeks per year. Or a household must include 2.1 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Arizona, the estimated mean (average) wage for a renter is \$13.93. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 47 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Arkansas

In Arkansas, the Fair Market Rent (FMR) for a two-bedroom apartment is \$593. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$1,978 monthly or \$23,733 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$11.41

In Arkansas, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 63 hours per week, 52 weeks per year. Or a household must include 1.6 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Arkansas, the estimated mean (average) wage for a renter is \$10.83. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 42 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.1 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

California

In California, the Fair Market Rent (FMR) for a two-bedroom apartment is \$1,353. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$4,511 monthly or \$54,127 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$26.02

In California, a minimum wage worker earns an hourly wage of \$8.00. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 130 hours per week, 52 weeks per year. Or a household must include 3.3 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In California, the estimated mean (average) wage for a renter is \$17.68. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 59 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.5 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Colorado

In Colorado, the Fair Market Rent (FMR) for a two-bedroom apartment is \$841. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,805 monthly or \$33,657 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$16.18

In Colorado, a minimum wage worker earns an hourly wage of \$7.64. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 85 hours per week, 52 weeks per year. Or a household must include 2.1 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Colorado, the estimated mean (average) wage for a renter is \$14.07. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 46 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.1 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Connecticut

In Connecticut, the Fair Market Rent (FMR) for a two-bedroom apartment is \$1,226. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$4,088 monthly or \$49,051 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$23.58

In Connecticut, a minimum wage worker earns an hourly wage of \$8.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 114 hours per week, 52 weeks per year. Or a household must include 2.9 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Connecticut, the estimated mean (average) wage for a renter is \$15.81. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 60 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.5 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

This information is provided for New England states only, because only in these states do FMR and metropolitan areas include portions of counties, rather than entire counties.

Delaware

In Delaware, the Fair Market Rent (FMR) for a two-bedroom apartment is \$970. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$3,232 monthly or \$38,784 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$18.65

In Delaware, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 103 hours per week, 52 weeks per year. Or a household must include 2.6 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Delaware, the estimated mean (average) wage for a renter is \$14.37. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 52 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.3 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

1: FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011). 2: AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

District of Columbia

In the District of Columbia, the Fair Market Rent (FMR) for a two-bedroom apartment is \$1,506. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$5,020 monthly or \$60,240 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$28.96

In the District of Columbia, a minimum wage worker earns an hourly wage of \$8.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 140 hours per week, 52 weeks per year. Or a household must include 3.5 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In the District of Columbia, the estimated mean (average) wage for a renter is \$25.17. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 46 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Florida

In Florida, the Fair Market Rent (FMR) for a two-bedroom apartment is \$965. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$3,217 monthly or \$38,607 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$18.56

In Florida, a minimum wage worker earns an hourly wage of \$7.67. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 97 hours per week, 52 weeks per year. Or a household must include 2.4 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Florida, the estimated mean (average) wage for a renter is \$13.47. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 55 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.4 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Georgia

In Georgia, the Fair Market Rent (FMR) for a two-bedroom apartment is \$747. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,492 monthly or \$29,899 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$14.37

In Georgia, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 79 hours per week, 52 weeks per year. Or a household must include 2.0 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Georgia, the estimated mean (average) wage for a renter is \$13.15. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 44 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.1 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Hawaii

In Hawaii, the Fair Market Rent (FMR) for a two-bedroom apartment is \$1,647. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$5,491 monthly or \$65,889 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$31.68

In Hawaii, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 175 hours per week, 52 weeks per year. Or a household must include 4.4 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Hawaii, the estimated mean (average) wage for a renter is \$13.61. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 93 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 2.3 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Idaho

In Idaho, the Fair Market Rent (FMR) for a two-bedroom apartment is \$665. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,218 monthly or \$26,615 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$12.80

In Idaho, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 71 hours per week, 52 weeks per year. Or a household must include 1.8 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Idaho, the estimated mean (average) wage for a renter is \$10.48. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 49 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

† Wage data not available (See Appendix A).

1: FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011). 2: AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

Illinois

In Illinois, the Fair Market Rent (FMR) for a two-bedroom apartment is \$873. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,909 monthly or \$34,912 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$16.78

In Illinois, a minimum wage worker earns an hourly wage of \$8.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 81 hours per week, 52 weeks per year. Or a household must include 2.0 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Illinois, the estimated mean (average) wage for a renter is \$13.95. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 48 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Indiana

In Indiana, the Fair Market Rent (FMR) for a two-bedroom apartment is \$698. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,328 monthly or \$27,933 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$13.43

In Indiana, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 74 hours per week, 52 weeks per year. Or a household must include 1.9 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Indiana, the estimated mean (average) wage for a renter is \$11.12. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 48 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

1: FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011). 2: AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

1: FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011). 2: AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

Iowa

In Iowa, the Fair Market Rent (FMR) for a two-bedroom apartment is \$637. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,123 monthly or \$25,477 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$12.25

In Iowa, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 68 hours per week, 52 weeks per year. Or a household must include 1.7 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Iowa, the estimated mean (average) wage for a renter is \$10.29. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 48 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

Kansas

In Kansas, the Fair Market Rent (FMR) for a two-bedroom apartment is \$660. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,201 monthly or \$26,415 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$12.70

In Kansas, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 70 hours per week, 52 weeks per year. Or a household must include 1.8 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Kansas, the estimated mean (average) wage for a renter is \$11.44. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 44 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.1 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

1: FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011). 2: AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

Kentucky

In Kentucky, the Fair Market Rent (FMR) for a two-bedroom apartment is \$616. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,054 monthly or \$24,648 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$11.85

In Kentucky, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 65 hours per week, 52 weeks per year. Or a household must include 1.6 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Kentucky, the estimated mean (average) wage for a renter is \$10.76. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 44 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.1 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

1: FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011). 2: AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

Louisiana

In Louisiana, the Fair Market Rent (FMR) for a two-bedroom apartment is \$736. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,453 monthly or \$29,436 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$14.15

In Louisiana, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 78 hours per week, 52 weeks per year. Or a household must include 2.0 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Louisiana, the estimated mean (average) wage for a renter is \$12.54. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 45 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.1 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Maine

In Maine, the Fair Market Rent (FMR) for a two-bedroom apartment is \$785. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,618 monthly or \$31,413 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$15.10

In Maine, a minimum wage worker earns an hourly wage of \$7.50. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 81 hours per week, 52 weeks per year. Or a household must include 2.0 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Maine, the estimated mean (average) wage for a renter is \$9.82. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 62 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.5 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

This information is provided for New England states only, because only in these states do FMR and metropolitan areas include portions of counties, rather than entire counties.

Maryland

In Maryland, the Fair Market Rent (FMR) for a two-bedroom apartment is \$1,291. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$4,303 monthly or \$51,637 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$24.83

In Maryland, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 137 hours per week, 52 weeks per year. Or a household must include 3.4 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Maryland, the estimated mean (average) wage for a renter is \$15.06. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 66 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.6 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Massachusetts

In Massachusetts, the Fair Market Rent (FMR) for a two-bedroom apartment is \$1,187. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$3,958 monthly or \$47,499 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$22.84

In Massachusetts, a minimum wage worker earns an hourly wage of \$8.00. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 114 hours per week, 52 weeks per year. Or a household must include 2.9 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Massachusetts, the estimated mean (average) wage for a renter is \$16.94. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 54 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.3 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Michigan

In Michigan, the Fair Market Rent (FMR) for a two-bedroom apartment is \$738. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,459 monthly or \$29,512 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$14.19

In Michigan, a minimum wage worker earns an hourly wage of \$7.40. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 77 hours per week, 52 weeks per year. Or a household must include 1.9 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Michigan, the estimated mean (average) wage for a renter is \$11.40. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 50 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Minnesota

In Minnesota, the Fair Market Rent (FMR) for a two-bedroom apartment is \$806. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,687 monthly or \$32,250 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$15.50

In Minnesota, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 86 hours per week, 52 weeks per year. Or a household must include 2.1 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Minnesota, the estimated mean (average) wage for a renter is \$12.17. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 51 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.3 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

1: FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011). 2: AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

1: FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011). 2: AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

Mississippi

In Mississippi, the Fair Market Rent (FMR) for a two-bedroom apartment is \$622. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,074 monthly or \$24,891 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$11.97

In Mississippi, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 66 hours per week, 52 weeks per year. Or a household must include 1.7 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Mississippi, the estimated mean (average) wage for a renter is \$10.03. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 48 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Missouri

In Missouri, the Fair Market Rent (FMR) for a two-bedroom apartment is \$693. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,311 monthly or \$27,737 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$13.34

In Missouri, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 74 hours per week, 52 weeks per year. Or a household must include 1.8 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Missouri, the estimated mean (average) wage for a renter is \$11.73. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 45 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.1 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Sullivan City (part of Crawford County) is not included due to a lack of sufficient data.

1: FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011). 2: AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

Montana

In Montana, the Fair Market Rent (FMR) for a two-bedroom apartment is \$655. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,182 monthly or \$26,181 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$12.59

In Montana, a minimum wage worker earns an hourly wage of \$7.65. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 66 hours per week, 52 weeks per year. Or a household must include 1.6 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Montana, the estimated mean (average) wage for a renter is \$10.16. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 50 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Nebraska

In Nebraska, the Fair Market Rent (FMR) for a two-bedroom apartment is \$684. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,281 monthly or \$27,372 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$13.16

In Nebraska, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 73 hours per week, 52 weeks per year. Or a household must include 1.8 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Nebraska, the estimated mean (average) wage for a renter is \$10.48. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 50 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.3 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Nevada

In Nevada, the Fair Market Rent (FMR) for a two-bedroom apartment is \$987. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$3,290 monthly or \$39,481 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$18.98

In Nevada, a minimum wage worker earns an hourly wage of \$8.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 92 hours per week, 52 weeks per year. Or a household must include 2.3 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Nevada, the estimated mean (average) wage for a renter is \$14.36. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 53 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.3 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

* 50th percentile FMR (See Appendix A). † Wage data not available (See Appendix A).

1: FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011). 2: AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

New Hampshire

In New Hampshire, the Fair Market Rent (FMR) for a two-bedroom apartment is \$1,003. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$3,343 monthly or \$40,121 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$19.29

In New Hampshire, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 106 hours per week, 52 weeks per year. Or a household must include 2.7 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In New Hampshire, the estimated mean (average) wage for a renter is \$13.13. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 59 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.5 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

This information is provided for New England states only, because only in these states do FMR and metropolitan areas include portions of counties, rather than entire counties.

New Jersey

In New Jersey, the Fair Market Rent (FMR) for a two-bedroom apartment is \$1,302. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$4,340 monthly or \$52,081 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$25.04

In New Jersey, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 138 hours per week, 52 weeks per year. Or a household must include 3.5 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In New Jersey, the estimated mean (average) wage for a renter is \$16.40. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 61 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.5 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

New Mexico

In New Mexico, the Fair Market Rent (FMR) for a two-bedroom apartment is \$660. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,201 monthly or \$26,406 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$12.70

In New Mexico, a minimum wage worker earns an hourly wage of \$7.50. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 68 hours per week, 52 weeks per year. Or a household must include 1.7 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In New Mexico, the estimated mean (average) wage for a renter is \$11.88. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 43 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.1 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

New York

In New York, the Fair Market Rent (FMR) for a two-bedroom apartment is \$1,283. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$4,278 monthly or \$51,337 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$24.68

In New York, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 136 hours per week, 52 weeks per year. Or a household must include 3.4 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In New York, the estimated mean (average) wage for a renter is \$21.45. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 46 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

North Carolina

In North Carolina, the Fair Market Rent (FMR) for a two-bedroom apartment is \$709. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,363 monthly or \$28,351 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$13.63

In North Carolina, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 75 hours per week, 52 weeks per year. Or a household must include 1.9 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In North Carolina, the estimated mean (average) wage for a renter is \$12.11. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 45 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.1 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

North Dakota

In North Dakota, the Fair Market Rent (FMR) for a two-bedroom apartment is \$639. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,131 monthly or \$25,571 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$12.29

In North Dakota, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 68 hours per week, 52 weeks per year. Or a household must include 1.7 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In North Dakota, the estimated mean (average) wage for a renter is \$10.82. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 45 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.1 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

Ohio

In Ohio, the Fair Market Rent (FMR) for a two-bedroom apartment is \$698. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,327 monthly or \$27,926 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$13.43

In Ohio, a minimum wage worker earns an hourly wage of \$7.70. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 70 hours per week, 52 weeks per year. Or a household must include 1.7 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Ohio, the estimated mean (average) wage for a renter is \$11.20. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 48 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Oklahoma

In Oklahoma, the Fair Market Rent (FMR) for a two-bedroom apartment is \$647. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,156 monthly or \$25,873 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$12.44

In Oklahoma, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 69 hours per week, 52 weeks per year. Or a household must include 1.7 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Oklahoma, the estimated mean (average) wage for a renter is \$11.60. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 43 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.1 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Oregon

In Oregon, the Fair Market Rent (FMR) for a two-bedroom apartment is \$807. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,691 monthly or \$32,289 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$15.52

In Oregon, a minimum wage worker earns an hourly wage of \$8.80. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 71 hours per week, 52 weeks per year. Or a household must include 1.8 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Oregon, the estimated mean (average) wage for a renter is \$12.59. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 49 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

Pennsylvania

In Pennsylvania, the Fair Market Rent (FMR) for a two-bedroom apartment is \$835. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,784 monthly or \$33,404 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$16.06

In Pennsylvania, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 89 hours per week, 52 weeks per year. Or a household must include 2.2 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Pennsylvania, the estimated mean (average) wage for a renter is \$12.86. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 50 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

* 50th percentile FMR (See Appendix A). † Wage data not available (See Appendix A).

1: FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011). 2: AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

Puerto Rico

In Puerto Rico, the Fair Market Rent (FMR) for a two-bedroom apartment is \$514. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$1,713 monthly or \$20,551 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$9.88

In Puerto Rico, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 55 hours per week, 52 weeks per year. Or a household must include 1.4 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Puerto Rico, the estimated mean (average) wage for a renter is \$6.57. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 60 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.5 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Rhode Island

In Rhode Island, the Fair Market Rent (FMR) for a two-bedroom apartment is \$924. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$3,081 monthly or \$36,974 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$17.78

In Rhode Island, a minimum wage worker earns an hourly wage of \$7.40. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 96 hours per week, 52 weeks per year. Or a household must include 2.4 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Rhode Island, the estimated mean (average) wage for a renter is \$11.64. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 61 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.5 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

South Carolina

In South Carolina, the Fair Market Rent (FMR) for a two-bedroom apartment is \$698. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,327 monthly or \$27,929 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$13.43

In South Carolina, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 74 hours per week, 52 weeks per year. Or a household must include 1.9 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In South Carolina, the estimated mean (average) wage for a renter is \$10.99. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 49 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

South Dakota

In South Dakota, the Fair Market Rent (FMR) for a two-bedroom apartment is \$599. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$1,996 monthly or \$23,954 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$11.52

In South Dakota, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 64 hours per week, 52 weeks per year. Or a household must include 1.6 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In South Dakota, the estimated mean (average) wage for a renter is \$9.61. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 48 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Tennessee

In Tennessee, the Fair Market Rent (FMR) for a two-bedroom apartment is \$653. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,177 monthly or \$26,127 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$12.56

In Tennessee, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 69 hours per week, 52 weeks per year. Or a household must include 1.7 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Tennessee, the estimated mean (average) wage for a renter is \$12.15. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 41 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.0 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Texas

In Texas, the Fair Market Rent (FMR) for a two-bedroom apartment is \$826. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,753 monthly or \$33,039 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$15.88

In Texas, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 88 hours per week, 52 weeks per year. Or a household must include 2.2 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Texas, the estimated mean (average) wage for a renter is \$14.97. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 42 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.1 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

* 50th percentile FMR (See Appendix A). † Wage data not available (See Appendix A).

1: FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011). 2: AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

* 50th percentile FMR (See Appendix A). † Wage data not available (See Appendix A).

1: FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011). 2: AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

Utah

In Utah, the Fair Market Rent (FMR) for a two-bedroom apartment is \$727. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,424 monthly or \$29,089 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$13.99

In Utah, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 77 hours per week, 52 weeks per year. Or a household must include 1.9 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Utah, the estimated mean (average) wage for a renter is \$11.75. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 48 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Vermont

In Vermont, the Fair Market Rent (FMR) for a two-bedroom apartment is \$976. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$3,254 monthly or \$39,051 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$18.77

In Vermont, a minimum wage worker earns an hourly wage of \$8.46. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 89 hours per week, 52 weeks per year. Or a household must include 2.2 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Vermont, the estimated mean (average) wage for a renter is \$11.06. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 68 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.7 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Washington

In Washington, the Fair Market Rent (FMR) for a two-bedroom apartment is \$944. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$3,147 monthly or \$37,766 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$18.16

In Washington, a minimum wage worker earns an hourly wage of \$9.04. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 80 hours per week, 52 weeks per year. Or a household must include 2.0 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Washington, the estimated mean (average) wage for a renter is \$14.62. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 50 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

1: FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011). 2: AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

West Virginia

In West Virginia, the Fair Market Rent (FMR) for a two-bedroom apartment is \$598. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$1,993 monthly or \$23,917 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$11.50

In West Virginia, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 63 hours per week, 52 weeks per year. Or a household must include 1.6 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In West Virginia, the estimated mean (average) wage for a renter is \$9.88. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 47 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.2 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

1: FMR = Fiscal Year 2012 Fair Market Rent (HUD, 2011). 2: AMI = Fiscal Year 2012 Area Median Income (HUD, 2011).

3: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs

4: The federal standard for extremely low income households. Does not include HUD-specific adjustments.

Wisconsin

In Wisconsin, the Fair Market Rent (FMR) for a two-bedroom apartment is \$740. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,467 monthly or \$29,603 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$14.23

In Wisconsin, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 79 hours per week, 52 weeks per year. Or a household must include 2.0 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Wisconsin, the estimated mean (average) wage for a renter is \$11.05. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 52 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 1.3 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

Wyoming

In Wyoming, the Fair Market Rent (FMR) for a two-bedroom apartment is \$646. In order to afford this level of rent and utilities – without paying more than 30% of income on housing – a household must earn \$2,152 monthly or \$25,828 annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into a Housing Wage of:

\$12.42

In Wyoming, a minimum wage worker earns an hourly wage of \$7.25. In order to afford the FMR for a two-bedroom apartment, a minimum wage earner must work 69 hours per week, 52 weeks per year. Or a household must include 1.7 minimum wage earners working 40 hours per week year-round in order to make the two-bedroom FMR affordable.

In Wyoming, the estimated mean (average) wage for a renter is \$13.60. In order to afford the FMR for a two-bedroom apartment at this wage, a renter must work 37 hours per week, 52 weeks per year. Or, working 40 hours per week year-round, a household must include 0.9 workers earning the mean renter wage in order to make the two-bedroom FMR affordable.

APPENDIX A:

Data Notes, Methodologies and Sources

Appendix A describes the data and methodological underpinnings of *Out of Reach*. Following a description of each subject, a link to the primary data source is provided. In some instances, supplementary material is also cited. Information on how to calculate and interpret the data can be found in the sections “Where the Numbers Come From” (page 6) and “How to Use the Numbers” (page 7).

FAIR MARKET RENT AREA DEFINITIONS

Each year, HUD determines Fair Market Rents (FMRs) for metropolitan and rural housing markets across the country. In metropolitan areas, HUD tries to use the most current Office of Management and Budget (OMB) metropolitan area definitions to define housing market boundaries for its FMR areas. Since FMR areas are meant to reflect cohesive housing markets, simply adopting the OMB definitions for administrative purposes is not always preferable. Also, significant changes to area definitions can affect current recipients. Thus, in keeping with guidance to all federal agencies from OMB, HUD modifies the boundaries in some instances for purposes of program administration.

Reacting to OMB’s sweeping post-Census overhaul of metropolitan area definitions in 2003, HUD developed FMR areas in 2005 that incorporated these new definitions, but modified them if a county (or town) to be added to an FMR area under those definitions had 2000 rents or incomes that deviated more than 5% from the newly defined metropolitan area.¹ HUD (and *Out of Reach*) refers to unmodified OMB-defined areas as Metropolitan Statistical Areas (MSAs) and modified areas as HUD Metro FMR Areas (HMFAs).

FY12 FMR areas incorporate the most recent (December 2009) OMB update of metropolitan area definitions. There have been no definition changes published by OMB since FY11, so the FY12 area definitions remain the same as the prior year.

In cases in which an FMR area crosses state lines, this report provides an entry for the area under both states. While the Housing Wage, FMR, and Area Median Income (AMI) values apply to the entire FMR area and will be the same in both states, other data such as the number of renter households and the minimum and renter wages apply only to the portion of the FMR area within that state’s borders.

FAIR MARKET RENTS

Prior to FY12, data from Census 2000 provided the foundation for HUD’s calculation of FMRs. For most areas, data on rent levels from the ACS were compared to Census 2000 data, and an update factor was calculated to project Census 2000 base rents to an intermediate rent estimate.

From FY05 until FY07, FMRs were updated from year to year based on either the Consumer Price Index (CPI) or periodic Random Digit Dialing (RDD) surveys. Since FY08, however, information from the American Community Survey (ACS) – an annual survey conducted by the U.S. Census Bureau that replaced the “long form” of the decennial census in 2010 – has provided more recent and more localized data on rental cost trends.

The methodological shift in calculating FMRs – from a reliance on CPI inflation factors and RDDs to the utilization of ACS data – is widely seen as an improvement and is expected to produce better estimates of local rents.

For FY12, HUD fully completed a transition to using the American Community Survey (ACS) as the baseline for calculating FMRs, instead of relying on the decennial census. With the release of the 2005-2009 five-year ACS data, updated data are available for all FMR areas, including areas with populations of less than 20,000, for the first time since the 2000 Decennial Census.

As it is not possible to easily identify recent movers in the five-year ACS data, base rents are determined using the standard quality two-bedroom gross rent estimates from the five-year ACS data, expressed as a 2009 figure. Then, a recent mover adjustment factor is applied to the base rents. Local area rent survey results are used as base rents when the survey results indicate rents that are statistically different from the ACS-based rents. In the development of the FY12 FMRs, local area rent surveys conducted in 2010 were used for the Williamsport, PA and Pike County, PA HMFAs.

The rent estimates determined using ACS data are trended through 2010 using local or regional CPI data and then increased at an annual rate of 3% for 15 months to project FMRs to April 2012.

While the *Out of Reach* printed book highlights the two-bedroom FMR, the online version of the report includes a broader data set covering the zero- to four-bedroom FMRs. The focus on the two-bedroom FMRs reflects HUD methodology. HUD finds that

¹ See Appendices A and B in *Out of Reach 2006* for additional information on HUD’s methodologies and their effects on FMR area definitions.

the two-bedroom rental units are most common and the most reliable to survey, so the two-bedroom units are utilized as the primary FMR estimate. The two-bedroom FMR estimates are then used to calculate and set FMRs for units of other sizes.

Prior editions of *Out of Reach* compared an area's FMR with its Census 2000 base rent. This made it possible to calculate the percentage increase in FMRs over the last eleven years. Due to the shift in the methodology used to develop the FY12 FMRs, FMRs are not comparable between FY12 and prior years.

HUD provides an online tool that illustrates the rationale behind each FMR area definition and the calculation of each FMR. HUD also publishes PDF and Excel files that list the counties and towns included in each area and their FY12 FMRs. These resources are available at www.huduser.org/datasets/fmr.html.

Appendix B contains excerpts from HUD's Notice of Final Fair Market Rents and includes a link to the full document.

40TH AND 50TH PERCENTILE FMR DESIGNATION

According to interim rule (65 FR 58870) published in 2000, HUD is required to set FMRs at the 50th percentile rent, rather than the 40th percentile, in large metropolitan areas with concentrated poverty. This rule was established to expand rental opportunities by making units in more expensive areas affordable to Housing Choice Voucher holders. Once designated, the FMR area retains its 50th percentile rent for three years, at which time HUD reviews it for continuing eligibility.

In FY11, 18 areas were designated as 50th percentile FMRs, and 11 of these areas will maintain their 50th percentile designation for FY12. Ten additional areas have now been designated as 50th percentile FMRs as of October 1, 2011. These FMR areas include 9 areas that failed to deconcentrate when evaluated for the FY09 FMRs but are now eligible for 50th percentile status again. One new area, Sacramento-Arden-Arcade-Roseville, CA HMFA, is participating for the first time.

An asterisk (*) is used to denote the 21 50th percentile areas in *Out of Reach*.

The last page in this appendix lists which FMR areas are currently eligible for the 50th percentile rent.

NATIONAL, STATE AND NONMETRO FAIR MARKET RENTS

HUD calculates FMRs for metropolitan areas and nonmetro counties, but not for states, combined nonmetro areas, or the nation. The FMRs for these larger geographies provided in *Out of Reach* are calculated by NLIHC and reflect the weighted average FMR for the counties included in the larger geography. The weight used for FMRs is the number of renter households within each county from the American Community Survey (2006-2010), released in December 2011.

AREA MEDIAN INCOME (AMI)

On December 1, 2011, HUD published its FY12 AMIs, used in this edition of *Out of Reach*. HUD calculates the AMI for families at the metropolitan level for more urbanized areas and at the county level for nonmetropolitan areas. The Census definition of "family" is two or more persons related by blood, marriage or adoption residing together. This family AMI value relates to the universe of all families and is not intended to apply to a specific family size.

In 2011, HUD updated the methodology used to calculate family AMIs due to the availability of new five-year ACS data. That year, HUD discontinued use of Census 2000 data in the production of FY11 AMIs.

The five-year (2005-2009) ACS data, which are available for nearly all areas of geography, are used to calculate the FY12 AMIs. Because new five-year ACS data had not been released in time for the December 1, 2011 AMI release date, HUD used the same five-year (2005-2009) ACS data as FY11 for the basis in the development of the FY12 MFIs.

In select cases where the one-year 2009 ACS is available, HUD uses the one-year data if the resulting estimate is significantly different from the five-year AMI. The 2009 AMI estimates are trended from 2009 to midpoint of 2012 using a factor of 3%.

Based on the incomes provided by HUD and applying the assumption that no more than 30% of income should be spent on housing costs (see below), *Out of Reach* calculates the maximum affordable rent for households earning the median income and 30% of the median (extremely low income). These calculations are presented in this book, and calculations corresponding to 50% and 80% of AMI are included in the online publication. It is important to note that these are straight percentages and do not include adjustments HUD uses in calculating its "income limits" for federal housing programs.

The median incomes for states, combined nonmetropolitan areas and the nation reported in *Out of Reach* reflect the average of local AMI data weighted by the total number of households provided by the five-year ACS (2006-2010).

A comprehensive list of the counties and towns included in FY12 income limit calculations can be found at <http://bit.ly/zmWLvJ> (PDF).

The methodology for calculating median family income estimates and a discussion of HUD's adjustments to subsequent income limits are provided in *FY 2012 HUD Income Limits Briefing Material*, available at <http://bit.ly/w2ARkS> (PDF).

AFFORDABILITY

Out of Reach is consistent with federal housing policy in the assumption that no more than 30% of a household's gross income should be consumed by gross housing costs. Spending more than 30% of income on housing is considered "unaffordable."²

Although *Out of Reach* explicitly addresses affordability in the rental housing market, housing affordability problems are not unique to renters. *The State of the Nation's Housing: 2011*, published by Harvard University's Joint Center for Housing Studies (www.jchs.harvard.edu/publications/markets/son2011.htm) includes an analysis of the affordability problems faced by homeowners.

PREVAILING MINIMUM WAGE

The federal minimum wage on January 1, 2012, was \$7.25 per hour; this wage was effective as of July, 2009. *Out of Reach* incorporates the federal minimum wage in effect at the time of publication.

According to data from the U.S. Department of Labor, the District of Columbia and 18 states had implemented a state minimum wage higher than \$7.25 by January 1, 2012. In place of the lower federal rate, *Out of Reach* incorporates the prevailing minimum wage in these states. Some local municipalities have a minimum wage that is higher than the federal rate, but this local rate is not incorporated into *Out of Reach* data.

Among the statistics included in *Out of Reach* are the number of hours and subsequent full-time jobs a minimum wage earner must work to afford the FMR. If the reader would like to calculate the same statistics using a different wage such as a higher local minimum wage, a simple formula can be used for the conversion:

$$\frac{[\text{hours or jobs at the published wage}] * [\text{published wage}]}{[\text{alternative wage}]}$$

For example, one would have to work 131 hours per week to afford the zero-bedroom FMR in San Francisco if the minimum wage in that location was equivalent to the national rate of \$7.25. However, the same FMR would be affordable in 93 hours under the higher local minimum wage of \$10.24³ ($131 * \$7.25 / \10.24). For further guidance, see "Where the Numbers Come From" (page 6) or contact NLIHC research staff.

The Department of Labor (www.dol.gov/whd/minwage/america.htm) provides further information on state minimum wage laws.

AVERAGE RENTER WAGE

Recognizing that the minimum wage reflects the earnings of only the lowest income workers, *Out of Reach* also calculates an estimated mean renter hourly wage. This measure reflects the compensation that a typical renter is likely to receive for an hour of work by dividing average weekly earnings by 40 hours, thus assuming a full-time workweek. Earnings include several non-wage forms of compensation like paid leave, bonuses, tips, and stock options.⁴

The estimated mean renter hourly wage is based on the average weekly earnings of private (non-governmental) employees working in each county.⁵ Renter wage information is based on 2010 data reported by the BLS in the Quarterly Census of Employment and Wages. For each county, mean hourly earnings are multiplied by the ratio of median renter income to median total household income in the American Community Survey (2006-2010) to arrive at an estimated average renter wage. In 23 cases, this results in an upward adjustment, but in all others it leads to a downward adjustment.

In roughly 14% of counties, this downward adjustment to reflect the lower income of renters results in an hourly wage that is below the federal minimum wage. One likely explanation is that workers in these counties average fewer than 40 hours per week, but the mean renter wage calculation assumes weekly compensation is the product of a full-time workweek. For example, mistakenly assuming earnings from 20 hours of work were the product of a full-time workweek would underestimate the actual hourly wage by half, but it would also accurately reflect the true earnings of renters under the assumption of a full-time schedule (see next section). As it was last year, the estimated mean renter hourly wage reported in *Out of Reach* has been adjusted to the same "as of" date assigned to FMRs and AMIs by HUD (April 1, 2012, for this fiscal year) and uses the same methodology that HUD uses to project its income estimates. Because annual average values calculated from BLS data might be considered "as of" July 1 for the calendar year for which they are reported, the data are projected to year-end 2010 using a national inflation factor. An annual rate of 3% is then used to grow renter wages for five quarters to April 1, 2012.⁶

Wage data from the Quarterly Census of Employment and Wages are available through the Bureau of Labor Statistics at www.bls.gov/cew/home.htm.

WORKING HOURS

Calculations of the Housing Wage and of the number of jobs required at the minimum wage or mean renter wage to afford the FMR assume that an individual works 40 hours per week, 52 weeks each year, for a total of 2,080 hours per year. Seasonal employment, unpaid sick leave, temporary lay-offs, and job changes as well as vacations prevent many individuals from maximizing their earnings throughout the year. According to Current Employment Statistics data from January 2012, the average wage earner in the U.S. worked 34.5 hours per week.⁷ And in related research, NLIHC finds that 29% of renter

² The Housing and Urban-Rural Recovery Act of 1983 made the 30% "rule of thumb" applicable to all current rental housing assistance programs. See Pelletiere, D. (2008). *Getting to the heart of housing's fundamental question: How much can a family afford?* Washington, D.C.: National Low Income Housing Coalition.

³ \$10.24 is the 2012 local minimum wage in San Francisco. www.sfgsa.org/index.aspx?page=411

⁴ Please note this measure is different from the Estimated Renter Median Household Income (provided online), which reflects an estimate of what renter households are earning today and includes income not earned in relation to employment.

⁵ Renter wage data for 30 counties are not provided in *Out of Reach* either because the BLS could not disclose the data for confidentiality reasons or because the number of employees working in the county was insufficient to estimate a reliable wage.

⁶ Following HUD's methodology for developing FY12 AMIs, a 3% growth rate was used to trend average renter wages from year-end 2010 to April 1, 2012.

⁷ Bureau of Labor Statistics. (2012). *The employment situation: January 2012*. Washington, D.C.: U.S. Department of Labor.

households that earn wage or salary income do not work as many as 40 hours per week, on average.⁹

These statistics should remind the reader that not all employees have the opportunity to translate an hourly wage into full-time, year-round employment. For these households, the Housing Wage underestimates the actual hourly compensation that a worker must earn to afford the FMR. Conversely, some households include multiple wage earners or single individuals that average more than 40 hours per week at work. For these, a home renting at the FMR would be affordable even if each worker earned less than the area's stated Housing Wage, as long as their combined wages exceed the Housing Wage.

For an expanded report on hours and earnings as reported by the Bureau of Labor Statistics, see *The Employment Situation: December 2011* at www.bls.gov/news.release/empsit.nr0.htm

SUPPLEMENTAL SECURITY INCOME (SSI)

Out of Reach compares rental housing costs with the rents affordable to individuals receiving Supplemental Security Income (SSI) payments. The numbers in *Out of Reach* are based on the maximum federal SSI payment for individuals in 2012, which is \$698 per month. *Out of Reach* calculations include supplemental payments that benefit all individual SSI recipients in the following six states because the payments are centrally administered by the Social Security Administration (SSA): California, Massachusetts, Nevada, New Jersey, New York, and Vermont.

Supplemental payments provided by an additional 39 states are excluded from *Out of Reach* calculations. For some, these payments are administered by the SSA but are available only to populations with specific disabilities, in specific facilities, or in specific household settings. For the vast majority, however, the supplements are administered directly by the states, so the data are not readily available. The only six states that do not supplement federal SSI payments are Arkansas, Arizona, North Dakota, Mississippi, Tennessee, and West Virginia. Residents of Puerto Rico cannot receive federal SSI payments.

Since SSI payments are set at the state level, the published version of *Out of Reach* calculates the difference between each state's average two-bedroom FMR and the rent that is affordable for SSI recipients. Readers can calculate this gap for any geography by subtracting the rent affordable to an SSI recipient from the area's FMR.

Information on SSI payments is available through the Social Security Administration at www.ssa.gov/oact/cola/SSIamts.html. Information on state supplements can be found at www.ssa.gov/pubs/statessi.html

The Technical Assistance Collaborative, Inc., publishes a biennial report comparing Fair Market Rents with the incomes of SSI recipients. Recent editions of *Priced Out* can be found at www.tacinc.org/resources/data/pricedout.

⁹ Wardrip, K. & Pelletiere, D. (2007).

ADDITIONAL DATA AVAILABLE ONLINE

Data available in the print version of *Out of Reach* are limited in an effort to present the most important information clearly. Additional data can be found online at www.nlihc.org/oor/2012.

The *Out of Reach* methodology was developed by Cushing N. Dolbeare, founder of the National Low Income Housing Coalition.

ELIGIBILITY FOR 50TH PERCENTILE FAIR MARKET RENT

In FY12, Fair Market Rents (FMRs) were set at the 50th percentile rent in 21 FMR areas where voucher tenants were concentrated in high-poverty areas. Compared with the typical 40th percentile rent, this higher voucher payment standard would provide tenants with housing options in less-impooverished areas. Eleven of these FMR areas were also designated as 50th percentile rent for FY11. Additionally, nine areas failed to deconcentrate when evaluated for FY09, but are now reinstated as 50th percentile FMRs. Lastly, one newly qualified area, the Sacramento-Arden-Arcade-Roseville HMFA, was found to qualify for the 50th percentile designation effective October 1, 2011.

REMAIN ELIGIBLE FOR FY12 50TH PERCENTILE FMR

Baltimore-Towson, MD MSA
Bergen-Passaic, NJ HMFA
Fort Lauderdale, FL HMFA
Grand Rapids-Wyoming, MI HMFA
Hartford-West Hartford-East Hartford, CT HMFA
Houston-Baytown-Sugar Land, TX HMFA
New Haven-Meriden, CT HMFA
North Port-Bradenton-Sarasota, FL MSA
Philadelphia-Camden-Wilmington, PA-NJ-DE-MD MSA
Washington-Arlington-Alexandria, DC-VA-MD HMFA
West Palm Beach-Boca Raton, FL HMFA

NEW AREAS ELIGIBLE FOR 50TH PERCENTILE FMR IN FY12

Austin-Round Rock-San Marcos, TX MSA
Fort Worth-Arlington, TX HMFA
Honolulu, HI MSA
Las Vegas-Paradise, NV MSA
Orange County, CA HMFA
Phoenix-Mesa-Glendale, AZ MSA
Riverside-San Bernardino-Ontario, CA HMFA
Sacramento-Arden-Arcade-Roseville, CA HMFA
Tucson, AZ MSA
Virginia Beach-Norfolk-Newport News VA-NC MSA

APPENDIX B:

Explanation of Fair Market Rent

Excerpts from Notice of Final Fair Market Rents for Fiscal Year 2012. Full document available at <http://bit.ly/xoSioC> (PDF).

Department of Housing and Urban Development
[Docket No. FR-5567-N-02]

FINAL FAIR MARKET RENTS FOR FISCAL YEAR 2012 FOR THE HOUSING CHOICE VOUCHER PROGRAM AND MODERATE REHABILITATION SINGLE ROOM OCCUPANCY PROGRAM

AGENCY: Office of the Assistant Secretary for Policy Development and Research, HUD

ACTION: Notice of Final Fair Market Rents (FMRs) for Fiscal Year (FY) 2012.

I. BACKGROUND

Section 8 of the USHA (42 U.S.C. 1437f) authorizes housing assistance to aid lower-income families in renting safe and decent housing. Housing assistance payments are limited by FMRs established by HUD for different geographic areas. In the HCV program, the FMR is the basis for determining the “payment standard amount” used to calculate the maximum monthly subsidy for an assisted family (see 24 CFR 982.503). In general, the FMR for an area is the amount that would be needed to pay the gross rent (shelter rent plus utilities) of privately owned, decent, and safe rental housing of a modest (non-luxury) nature with suitable amenities. In addition, all rents subsidized under the HCV program must meet reasonable rent standards. HUD’s regulations at 24 CFR 888.113 permit it to establish 50th percentile FMRs for certain areas.

II. PROCEDURES FOR THE DEVELOPMENT OF FMRs

Section 8(c) of the USHA requires the Secretary of HUD to publish FMRs periodically, but not less frequently than annually. Section 8(c) states in part, as follows:

Proposed fair market rentals for an area shall be published in the Federal Register with reasonable time for public comment and shall become effective upon the date of publication in final form in the Federal Register. Each fair market rental in effect under this subsection shall be adjusted to be effective on October 1 of each year to reflect

changes, based on the most recent available data trended so the rentals will be current for the year to which they apply, of rents for existing or newly constructed rental dwelling units, as the case may be, of various sizes and types in the market area.

HUD’s regulations at 24 CFR part 888 provide that HUD will develop proposed FMRs, publish them for public comment, provide a public comment period of at least 30 days, consider public comments that contain statistically valid rental housing survey data that justify the requested change, and publish final FMRs. (See 24 CFR 888.115.) For FY 2012 FMRs, HUD has considered all comments submitted in response to its August 19, 2011 (76 FR 52058) proposed FY 2012 FMRs and has posted the comments and its responses at www.huduser.org/portal/datasets/fmr.html. HUD will, however, continue to analyze data provided by these public comments to determine whether changes are justified. HUD will publish any changes in the Federal Register.

In addition, HUD’s regulations at 24 CFR 888.113 set out procedures for HUD to assess whether areas are eligible for FMRs at the 50th percentile. Minimally qualified areas¹ are reviewed each year unless not qualified to be reviewed. Areas that currently have 50th percentile FMRs are evaluated for progress in voucher tenant deconcentration after three years in the program. Continued eligibility is determined using HUD administrative data that show levels of voucher tenant concentration. The levels of voucher holder concentration must be above 25 percent and show a decrease in concentration since the last evaluation. At least 85 percent of the voucher units in the area must be used to make this determination. Areas are not qualified to be reviewed if they have been made a 50th percentile area within the last three years or have lost 50th percentile status for failure to de-concentrate within the last three years.

In FY 2011 there were 18 areas using 50th percentile FMRs. Of these 18 areas, 11 areas were allowed to continue as 50th percentile FMR areas, as listed below. There are 10 additional 50th percentile FMR areas, one that is new to the program, Sacramento-Arden-Arcade-Roseville, CA HMFA.² The other 9 areas failed to deconcentrate when evaluated for the FY 2009 FMRs, but are reinstated as 50th percentile FMRs. In summary, there are 21 50th percentile FMR areas in FY 2012. These areas are indicated by an asterisk in Schedule B, where all FMRs are listed by state. *[See the last page of Appendix A for information on 50th percentile areas.]*

¹ As defined in 24 CFR 888.113(c), a minimally qualified area is an area with at least 100 census tracts where 70 percent or fewer of the census tracts with at least 10 two-bedroom rental units are census tracts in which at least 30 percent of the two-bedroom rental units have gross rents at or below the two-bedroom FMR set at the 40th percentile rent. This is evaluated with 2000 Census tract data, while we are awaiting 2010 ACS data to be aggregated using 2010 Census tract definitions.

² HMFA is an acronym representing HUD Metropolitan FMR Area.

III. PROPOSED FY 2012 FMRs

On August 19, 2011 (76 FR 52058), HUD published proposed FY 2012 FMRs with a comment period that ended September 19, 2011. Among the comments HUD received were several that questioned the FY 2012 FMRs for their respective market areas. HUD has considered all public comments received and has posted its response to these comments on its website at www.huduser.org/portal/datasets/fmr.html. HUD will continue to review data provided by the comments and will publish any revisions to the FY 2012 FMRs resulting from data submissions in a forthcoming *Federal Register* notice.

IV. FMR METHODOLOGY

The FY 2012 FMRs are based on current OMB metropolitan area definitions and standards that were first used in the FY 2006 FMRs. OMB changes to the metropolitan area definitions through December 2009 are incorporated. There have been no area definition changes published by OMB since the publication of the FY 2011 FMRs; therefore, the FY 2012 area definitions are the same as those used in FY 2011.

A. Base Year Rents

The U.S. Census Bureau released standard tabulations of five-year ACS data collected between 2005 through 2009 in December of 2010. This is the first time that updated data are available for all FMR areas and their component geographies since the release of the 2000 Decennial Census data (previous ACS releases only covered areas with 20,000 or more in population). Because of this new data availability, HUD has the ability to estimate new base rents using the five-year ACS data.

FMRs are typically based on gross rents for recent movers (those who have moved into their current residence in the last 15 to 24 months). FMRs prior to FY 2012 were calculated from recent-mover gross rent estimates from the 2000 Census or from more current HUD-commissioned or PHA-commissioned rent surveys. However, due to the way the five-year data are constructed, recent-mover survey responses are not well defined. The five-year data are an aggregation of all survey data collected between January 2005 and December 2009 in a given area. Dollar values such as gross rents are transformed from the time period in which they were collected to an overall 2009 value using the national CPI. Attempting to limit the five-year data to those who have moved in the last 24 months severely limits the usefulness of the five-year data because this limitation automatically disqualifies at least 40 percent of the survey observations used in the five-year estimates. Consequently, all areas are assigned as a base rent the estimated two-bedroom standard-quality five-year gross rent from the ACS.³ Because HUD's regulations mandate that FMRs must be published as recent-mover gross rents, HUD has created a recent-mover adjustment factor to apply to the standard-quality base rents assigned from the five-year ACS data.

Local area rent surveys conducted in 2010 by HUD or PHAs are used as base rents when the survey results are statistically different from the ACS-based rents. The surveys for Williamsport, PA, MSA and Pike County, HMFA were evaluated and are being used in place of the 2009 ACS data. A survey conducted in 2010 for the county group, Bradford-Sullivan-Tioga, PA, was also evaluated, but there was no statistical difference from the 2009 ACS data, updated to 2010.

B. Recent Mover Adjustment Factor

Following the assignment of the standard-quality two-bedroom rent described above, HUD applies a recent mover adjustment factor to these rents. The following describes the process for determining the appropriate recent-mover adjustment factor.

For non-metropolitan areas, HUD calculated the percentage change between the five-year standard-quality rent for the non-metropolitan portion of the state and the one-year recent-mover rent for the same area.⁴ HUD then computes a z-score to determine if the five-year standard-quality rent and the one-year recent-mover rent are statistically different.⁵ If the two rents have a statistically significant difference, the recent-mover adjustment factor is set at the difference between the state non-metropolitan one-year recent-mover rent and the state non-metropolitan five-year standard-quality rent expressed as a percentage of the state non-metropolitan five-year standard-quality rent. If the two rents are not statistically different, the recent-mover adjustment factor is set to 1.0.

For metropolitan areas, the recent-mover adjustment factor is calculated in a similar fashion. HUD selects the smallest geographic area which encompasses the metropolitan area in question that has at least 100 recent mover observations to use in the calculation of the recent-mover adjustment factor. For HUD-defined subareas of OMB defined metropolitan areas, this means that the recent-mover adjustment factor may be based on the recent-mover data for the subarea, the entire metropolitan area, the metropolitan portions of the state, or finally the entire state depending on which geographic level has 100 or more recent mover observations.⁶ Once the area with 100 or more recent mover cases has been determined, HUD calculates a z-score comparing the one-year recent-mover two-bedroom gross rent with the five-year standard-quality two-bedroom gross rent for the recent-mover area. If the two rents are statistically different, HUD sets the recent-mover adjustment factor for the FMR area as the percentage change between the two rents for the recent-mover area. If the difference in rents is not statistically different, the recent-mover adjustment factor for the FMR area is set to 1.

For FMR areas without 100 recent-mover rents, a recent-mover adjustment factor is calculated at the smallest area level that does have 100 recent movers. For metropolitan areas, this order is subarea, metropolitan area, state metropolitan area, and state. For nonmetropolitan areas, the smallest area level is the state nonmetropolitan area, followed by the entire state. For an example of how the recent-mover adjustment factor is calculated for these areas, please review this methodology for Abilene, TX MSA and Baldwin County, AL, in the FY 2012 documentation system at <http://bit.ly/y29P0c>

³ For areas with a two-bedroom standard quality gross rent from the ACS that have a margin of error greater than the estimate or no estimate due to inadequate sample in the 2009 five-year ACS, HUD uses the two-bedroom state non-metro rent for non-metro areas.

⁴ HUD ensures that the recent mover estimate for each non-metropolitan portion of the state has at least 100 ACS sample observations. If any state non-metropolitan recent mover rent is based on fewer than 100 observations, the recent mover factor would be calculated based on the one-year recent mover data and five-year standard quality data for the entire state.

⁵ The change is considered statistically significant if Z is greater than 1.645 where Z is equal to the change between the estimate for the one-year data and the five-year estimate, over the square root of the sum of the squared standard error for the one-year estimate and the squared standard error of the five-year estimate.

⁶ For metropolitan areas that cross state boundaries, and where there are not 100 two-bedroom recent mover observations, HUD uses the weighted average update factors for the encompassing state metropolitan areas. HUD performs the Z-score test for statistical difference between the one-year recent-mover rent and five-year standard-quality rent separately for each state metropolitan part prior to computing the weighted average update factor.

(PDF). This process produces an “as of” 2009 recent mover two-bedroom base gross rent for the FMR area.⁷

C. Updates from 2009 to 2010

The ACS data are updated through 2009 using the one-half of the change in annual CPI measured between 2008 and 2009. This data are further updated through the end of 2010 using the annual change in CPI from 2009 to 2010. As in previous years, HUD uses Local CPI data for FMR areas with at least 75 percent of their population within Class A metropolitan areas covered by local CPI data. HUD uses Census region CPI data for FMR areas in Class B and C size metropolitan areas and nonmetropolitan areas without local CPI update factors.

D. Trend from 2010 to 2012

The national 1990 to 2000 average annual rent increase trend of 3 percent is applied to end-of-2010 rents for 15 months, to derive the proposed FY 2012 FMRs with a date of April 2012.

On March 9, 2011 (76 FR 12985), HUD published a notice requesting public comment regarding the manner in which it calculates the trend factor used in determining FMR estimates to meet the statutory requirement that FMRs be “trended so the rentals will be current for the year to which they apply.” HUD’s notice provided several proposed alternatives to the current trend factor and requested comments on the alternatives as well as suggestions of other ideas. These comments are discussed in further detail in the proposed FY 2012 FMR notice (76 FR 52058), but, in short, the commenters did not arrive at a consensus over how to change the trending methodology. Therefore, HUD will continue to consider the suggestions provided in the comments and make plans to implement a new methodology with the publication of FY 2013 Proposed FMRs.

E. Bedroom Rent Adjustments

HUD calculates the primary FMR estimates for two-bedroom units. This is generally the most common size of rental units and, therefore, the most reliable to survey and analyze. Formerly, after each Decennial Census, HUD calculated rent relationships between two-bedroom units and other unit sizes and used them to set FMRs for other units. HUD did this because it is much easier to update two-bedroom estimates and to use pre-established cost relationships with other bedroom sizes than it is to develop independent FMR estimates for each bedroom size. HUD did the last update of bedroom-rent relationships using 2000 Census data. A publicly releasable version of the data used for the derivations of rent ratios is available at www.huduser.org/portal/datasets/fmr/CensusRentData/index.html.

HUD made adjustments using 2000 Census data to establish rent ratios for areas with local bedroom-size intervals above or below what are considered reasonable ranges, or where sample sizes are inadequate to accurately measure bedroom rent differentials.

Experience has shown that highly unusual bedroom ratios typically reflect inadequate sample sizes or peculiar local circumstances that HUD would not want to utilize in setting FMRs (e.g., luxury efficiency apartments that rent for more than typical one-bedroom units). HUD established bedroom interval ranges based on an analysis of the range of such intervals for all areas with large enough samples to permit accurate bedroom ratio determinations. These ranges are: efficiency FMRs are constrained to fall between 0.65 and 0.83 of the two-bedroom FMR; one-bedroom FMRs must be between 0.76 and 0.90 of the two-bedroom FMR; three-bedroom FMRs must be between 1.10 and 1.34 of the two-bedroom FMR; and four-bedroom FMRs must be between 1.14 and 1.63 of the two-bedroom FMR. HUD adjusts bedroom rents for a given FMR area if the differentials between bedroom-size FMRs were inconsistent with normally observed patterns (i.e., efficiency rents are not allowed to be higher than one-bedroom rents and four-bedroom rents are not allowed to be lower than three-bedroom rents).

HUD further adjusts the rents for three-bedroom and larger units to reflect HUD’s policy to set higher rents for these units than would result from using unadjusted market rents. This adjustment is intended to increase the likelihood that the largest families, who have the most difficulty in leasing units, will be successful in finding eligible program units. The adjustment adds bonuses of 8.7 percent to the unadjusted three-bedroom FMR estimates and adds 7.7 percent to the unadjusted four-bedroom FMR estimates. The FMRs for unit sizes larger than four-bedrooms are calculated by adding 15 percent to the four-bedroom FMR for each extra bedroom. For example, the FMR for a five-bedroom unit is 1.15 times the four-bedroom FMR, and the FMR for a six-bedroom unit is 1.30 times the four-bedroom FMR. FMRs for single-room occupancy units are 0.75 times the zero-bedroom (efficiency) FMR.

For low-population, nonmetropolitan counties with small 2000 Census samples of recent-mover rents, HUD uses Census-defined county group data to determine rents for each bedroom size. HUD made this adjustment to protect against unrealistically high or low FMRs due to insufficient sample sizes. The areas covered by this estimation method had less than the HUD standard of 200 two-bedroom, Census-tabulated observations.

The 2010 Decennial Census did not collect the information necessary to update unit bedroom rent relationships. HUD intends to use the 2006-2010 five-year ACS data to update these relationships for the FY 2013 FMRs. HUD is choosing to wait until next year to ensure something closer to a consistent 10 year time period, but more importantly, because the 2010 ACS data will be published based on the 2010 Decennial Census geographic definitions.

V. MANUFACTURED HOME SPACE SURVEYS

The FMR used to establish payment standard amounts for the rental of manufactured home spaces in the HCV program is 40 percent of the FMR for a two-bedroom unit. HUD will consider modification of the manufactured home space FMRs where public comments present statistically valid survey data showing the 40th percentile manufactured home space rent (including the cost of utilities) for the entire FMR area.

⁷ The Pacific Islands (Guam, Northern Marianas and American Samoa) as well as the U.S. Virgin Islands are not covered by ACS data. As part of the 2010 Decennial Census, these areas were covered by a long-form survey. The results gathered by this long form survey will not be available until 2012. Therefore, HUD uses the national change in gross rents, measured between 2008 and 2009 to update last year’s FMR for these areas. Puerto Rico is covered by the Puerto Rico Community Survey within the American Community Survey; however, the gross rent data produced by the 2005-2009 ACS are not sufficient to adequately house voucher holders in Puerto Rico. This is due to the limited ability to eliminate units that do not pass the voucher program’s housing quality standards. Consequently, HUD is updating last year’s FMRs for Puerto Rico using the change in rents measured from all of Puerto Rico measured between the 2008 and 2009. For details behind these calculations, please see HUD’s FY 2012 FMR documentation system available at: www.huduser.org/portal/datasets/fmr/fmrs/docsys.html&data=fmr12

All approved exceptions to these rents that were in effect in FY 2011 were updated to FY 2012 using the same data used to estimate the HCV program FMRs. If the result of this computation was higher than 40 percent of the new two-bedroom rent, the exception remains and is listed in Schedule D. The FMR area definitions used for the rental of manufactured home spaces are the same as the area definitions used for the other FMRs.

VI. PUBLIC COMMENTS

As previously stated, HUD is unable to respond to all comments received on the proposed FY 2012 FMRs in this notice because of the timing of the comment end date; however, these responses will be available by the publication date of this notice on HUD's Web site at www.huduser.org/portal/datasets/fmr.html. HUD was able, however, to make a minor methodological change, in response to a comment received, that eliminates a negative recent mover adjustment for the only area with one, Cape Coral-Fort Myers, FL MSA. HUD will continue to review data provided by the comments and publish any revisions to the FY 2012 FMRs resulting from data submissions in a forthcoming *Federal Register*.

VII. FORMALIZE A PUBLICATION DATE FOR INCOME LIMITS

The FY 2012 Income Limits will be published on December 1, 2011. While the FY 2012 Income Limits do not benefit from any additional ACS data over what was included in the FY 2011 publication, they are updated with the FY 2012 FMRs for the purposes of evaluating areas of relatively high-or low-income to housing cost relationships and further updated with CPI to the end of 2010, trended to the mid-point of FY 2012 in a manner similar to what was done with the FY 2011 Median Family Income estimates and Income Limits. The FY 2013 Median Family Income estimates and Income Limits, published December 1, 2012, would be the first set of median family income estimates and income limits updated with ACS data collected from 2006-2010.

NLHHC is a membership organization open to individuals, organizations, corporations and government agencies.

EACH MEMBERSHIP MAKES A DIFFERENCE.

BENEFITS OF MEMBERSHIP

Memo to Members

Members receive this highly respected weekly newsletter by email or mail.

Calls To Action

Members receive email notification of significant policy developments warranting constituent calls or letters to Congress.

Shelterforce Subscription

Members receive the nation's oldest continually published housing and community development magazine.

Discounted Conference Fees

NLHHC hosts an annual policy conference and leadership reception in Washington, D.C. The conference brings together advocates, researchers, academics, individuals with low incomes, and government experts to share expertise and insights on the latest federal housing policy initiatives.

Free or Discounted Publications

NLHHC produces numerous publications each year, including the *Advocates' Guide* and *Out of Reach*.

Telephone resource referrals with linkages to state and regional networks

Participation in policy-setting decisions of NLHHC
