## NATIONAL LOW INCOME HOUSING COALITION

Established in 1974 by Cushing N. Dolbeare, the National Low Income Housing Coalition is dedicated solely to achieving socially just public policy that assures people with the lowest incomes in the United States have affordable and decent homes. NLIHC educates, organizes, and advocates to ensure decent, affordable housing within healthy neighborhoods for everyone.

NLIHC provides up-to-date information, formulates policy, and educates the public on housing needs and the strategies for solutions. Permission to reprint portions of this report or the data therein is granted, provided appropriate credit is given to the National Low Income Housing Coalition. Additional copies of *Out of Reach* are available from NLIHC.

The data for nonmetropolitan areas included in *Out of Reach* are published in collaboration with the Housing Assistance Council.

# PREFACE

BY JULIÁN CASTRO,  
SECRETARY OF THE U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Nearly a century ago, President Theodore Roosevelt became the nation's first chief executive to propose federal investment to create housing specifically for low-income Americans. It was a monumental step in the long march toward ensuring that a decent, affordable home is available to every citizen. And it spoke to a fundamental truth that has long been at the heart of the National Low Income Housing Coalition's (NLIHC) work: Our nation can't fulfill any of our major goals — whether it's tackling inequality, improving healthcare, keeping neighborhoods safe, or making sure every child gets a good education — unless we also focus on housing. That is because housing is one of the most basic needs we have, a need that is as much about how we live as about where we live.

In the years since President Roosevelt's bold stand, we've come together, time and again, to expand the promise of a good home to more families. We did that through the creation of the Federal Housing Administration and by building public housing as part of President Franklin Roosevelt's New Deal. We did it through the passage of the Fair Housing Act in 1968, which continues to help foster a housing market that is free from discrimination. We did it in the 1990s, when we invested new resources to help strengthen rural and urban communities and expand affordable housing across the nation. And, under President Barack Obama's leadership, we've done that over the last seven years by supporting our housing market's recovery, preserving public housing, joining forces with states, cities, towns, and tribal communities to help end homelessness, and fighting to make our rental market more affordable.

We've achieved a lot together. But as the report you're about to read shows, we have a lot of work to do to realize our shared vision of a secure home for every American. Today, there is a shortage of 7.2 million affordable housing units for the nation's more than 10 million extremely low-income families. It's a crisis that is making it ever harder for families to find housing and forcing many people to choose between doubling up in a friend's apartment or sleeping in their car. As difficult as it can be to find a home, keeping that home can be just as daunting.

Three-quarters of extremely low-income families pay more than half of their income just to keep a roof over their heads, leaving less money for food, child care, transportation, and so many other basic necessities.

And it's not just people of very modest means who are working harder to make ends meet. Last year, rising rents in a number of cities outpaced the rate of inflation, which is hurting low- and moderate-income Americans. I learned of one San Jose family in which both parents worked full-time but the only place they could afford was at a local homeless shelter. The crisis is also affecting seniors, many of whom live on fixed incomes. Today, HUD is only able to serve one out of every three seniors who needs our help. And Harvard's Joint Center for Housing Studies calculated that as our nation ages, HUD would need to provide housing support for an additional 900,000 seniors just to keep pace between now and 2030.

Tackling our affordability crisis isn't just the right thing to do — it's also one of the best ways we can invest in our nation's long term growth and competitiveness. That is the message from this year's *Out of Reach* report. This report confirms that investing in affordable housing — as HUD is doing by providing annual housing support for nearly 5.5 million households and through the new national Housing Trust Fund, as part of innovative efforts like the Rental Assistance Demonstration, and with incentives like the Low Income Housing Tax Credit — is one of the most important steps we can take to help people succeed today, and live healthier lives long into the future.

I urge everyone who's moved by what you read here to join us in the cause of ensuring that every American has the opportunity to secure a decent home in a neighborhood of promise. That is the vision we've been fighting to realize for nearly a century. Let's accomplish it for every family in this 21st century and beyond.

HUD Secretary  
Julián Castro

# INTRODUCTION

**N**LHC's annual report, *Out of Reach*, documents the gap between wages and the price of housing across the United States. The report's Housing Wage is an estimate of the hourly wage that a full-time worker must earn to afford a modest and safe rental home without spending more than 30% of his or her income on rent and utility costs. This year's findings highlight the struggle faced by millions of families in affording a safe and decent home. Wage stagnation, particularly among lower wage workers, rising rents, and an inadequate supply of affordable housing continue to present significant challenges.

**In 2016, the national Housing Wage is \$20.30 for a two-bedroom rental unit and \$16.35 for a one-bedroom rental unit.** A worker earning the federal minimum wage of \$7.25 per hour would need to work 2.8 full time jobs, or approximately 112 hours per week for all 52 weeks of the year, in order to afford a two-bedroom apartment at HUD's Fair Market Rent (FMR). If this worker slept for eight hours per night, he or she would have no remaining time during the week for anything other than working and sleeping.

Twenty-nine states, the District of Columbia, and a small number of local jurisdictions have a minimum wage higher than the federal level. **However, in no state, metropolitan area, or county can a full-time worker earning the prevailing minimum wage afford a modest two-bedroom apartment.** In only twelve counties and one metropolitan area is the prevailing minimum wage sufficient to afford a modest one-bedroom apartment.<sup>1</sup> Local minimum wages higher than the prevailing federal or state levels still fall short of the local one-bedroom and two-bedroom housing wage (Table 1).

The struggle to afford a decent home isn't limited to minimum wage workers. The average hourly wage of renters in the U.S. is \$15.42, \$4.88 less than the two-bedroom Housing Wage. In many states, the gap between the mean renter wage and the Housing Wage is significant (Figure 1). In no state is the mean renter wage sufficient to afford a two-bedroom apartment at the FMR.

The lowest income households face the

<sup>1</sup> All of them are located in West Virginia and Washington State.

## DEFINITIONS

**Affordability** in this report is consistent with the federal standard that no more than 30% of a household's gross income should be spent on rent and utilities. Households paying over 30% of their income are considered cost burdened. Households paying over 50% of their income are considered severely cost burdened.

**Area Median Income (AMI)** is used to determine income eligibility for affordable housing programs. The AMI is set according to family size and varies by region.

**Extremely Low Income (ELI)** refers to earning less than 30% of AMI.

**Housing Wage** is the estimated full-time hourly wage a household must earn to afford a decent rental unit at HUD-estimated Fair Market Rent while spending no more than 30% of their income on housing costs.

**Full-time work** is defined as 2,080 hours per year (40 hours each week for 52 weeks). The average employee works roughly 34.4 hours per week, according to the Bureau of Labor Statistics.

**Fair Market Rent (FMR)** is typically the 40th percentile of gross rents for standard rental units. FMRs are determined by HUD on an annual basis, and reflect the cost of shelter and utilities. FMRs are used to determine payment standards for the Housing Choice Voucher program and Section 8 contracts.

**Renter wage** is the estimated mean hourly wage among renters, based on 2014 Bureau of Labor Statistics wage data, adjusted by the ratio of renter income to the overall household income reported in the ACS and projected to 2016.

greatest housing affordability challenges (Figure 2). Extremely low income (ELI) households have income at or below 30% of their area median. On average, they can afford to spend no more than \$507 per month on housing costs. An individual relying on Supplemental Security Income (SSI) in 2016 can only afford monthly rent of \$220. Meanwhile, the national average monthly rent for a modest one-bedroom apartment is \$850. The national average cost of a modest one-bedroom apartment would consume more than a single SSI recipient's entire income. Such an individual would be unable to maintain shelter without housing assistance.

*Out of Reach 2016* clearly indicates that renters, particularly those with the lowest incomes, face significant affordability barriers in securing safe, decent, affordable homes. The next two sections explore two causes of this affordability crisis and how a new federal housing program, the national Housing Trust Fund (HTF), can help address it.

## Wage Stagnation and Income Inequality

Wage stagnation and income inequality contribute to the gap between what people earn and the cost of their housing. From 2007 to 2015, the bottom 10% of wage earners saw a 0.2% increase in real hourly wages, while the top 5% saw an 8.7% increase,<sup>2</sup> continuing a long-term trend of growing income inequality. Between 1979 and 2013, the bottom 10% of wage earners saw a 5.3% decline in real hourly wages, while the top 5% saw a 40.6% increase.<sup>3</sup>

FIGURE 1: STATES WITH THE LARGEST SHORTFALL BETWEEN TWO BEDROOM HOUSING WAGE AND RENTER WAGE

An analysis by the Brookings Institution found that cities with greater income inequality tend to have lower housing affordability for low income households.<sup>4</sup> Greater income inequality was associated with greater housing cost burdens among the poorest 20% of households. Household income at the 95th percentile of the income distribution correlated positively with housing costs at the bottom 20% of the rental market. These findings suggest that housing markets are more responsive to the demand for rental housing among higher income households than to the housing needs of lower income households.

**FIGURE 2: RENTS REMAIN OUT OF REACH FOR MANY RENTERS**

The declining inflation-adjusted value of the federal minimum wage contributes to wage inequality<sup>5</sup> and the housing affordability challenges faced by low wage workers. Local, state, and national efforts to increase the minimum wage are critical, but on their own will not completely close the housing affordability gap. At least twenty-two local jurisdictions now have a minimum wage higher than their prevailing state or federal level. All fall short of the one-bedroom and two-bedroom Housing Wage (Table 1). Minimum wage legislation introduced in Congress also falls short. The Pay Workers a Living Wage Act (S.1832 / H.R. 3164) would raise the minimum wage to \$15 an hour, \$1.35 and \$5.30 short of the national one-bedroom and two-bedroom Housing Wage. A separate bill, the Original Living Wage Act (H.R. 122), would set the federal minimum wage at 115% of the federal poverty threshold for a family

of four with two children, assuming full-time employment. In 2015, the minimum wage under this legislation would be \$13.29.

## Rising Rents and the Inadequate Supply of Affordable Housing

The demand for rental housing is at its highest level since the 1960s.<sup>6</sup> In the past decade alone, the U.S. has added nine million renter households, but only 8.2 million rental housing units to its housing stock. Vacancy rates are at their lowest levels since 1985 and rents have risen at an annual rate of 3.5%, the fastest pace in three decades.<sup>7</sup>

6 Joint Center for Housing Studies of Harvard University. (2015). *America's rental housing: Expanding options for diverse and growing demand*. Cambridge, MA: Author. [http://www.jchs.harvard.edu/sites/jchs.harvard.edu/files/ctools/css/americas\\_rental\\_housing\\_2015\\_web.pdf](http://www.jchs.harvard.edu/sites/jchs.harvard.edu/files/ctools/css/americas_rental_housing_2015_web.pdf).

7 *Ibid.*

Growth in the supply of low cost rental units has not kept pace with the significant growth in demand. Between 2003 and 2013, the number of low cost units renting for less than \$400 increased by 10%, but the number of renter households in need of these units increased by 40%.<sup>8</sup> The nation's 10.4 million ELI renter households currently face a shortage of 7.2 million affordable and available rental units, leaving 31 affordable and available units for every 100 ELI renter households.<sup>9</sup> Unable to find affordable homes, seventy-five percent of ELI renter households are now severely cost burdened, spending more than half of their income on rent and utilities.<sup>10</sup> This burden makes it difficult to afford other basic necessities like healthy food and medication and to save for financial emergencies. Severe cost burden is a risk factor for housing instability and homelessness, which exacerbates the financial and psychological stress within a family. Very low income (VLI) renter households earning no more than 50% of their area median income face a similar shortage of 57 affordable and available units for every 100 VLI renter households.<sup>11</sup>

Absent public subsidy, the private market does little to produce new rental housing affordable to the lowest income households. The rent these households can afford to pay often does not cover debt service on the capital costs of development and other operating expenses. Because of high

8 *Ibid.*

9 Affordable and available homes are affordable to a particular income group and either vacant or occupied by a household of that income group.

10 National Low Income Housing Coalition. (2016). *The gap: The affordable housing gap analysis 2016*. Washington, DC: Author. Retrieved from [http://nlihc.org/sites/default/files/Gap-Report\\_print.pdf](http://nlihc.org/sites/default/files/Gap-Report_print.pdf).

11 *Ibid.*

development costs, developers target new rental units to the upper end of the rental market where rents are higher.

Nearly three-quarters of the rental housing occupied by households in the bottom three-fifths of the U.S. income distribution is the result of downward filtering of housing units as they become older and less desirable relative to new housing.<sup>12</sup> Older housing of adequate quality however rarely becomes cheap enough for ELI renters. In high demand housing markets, owners have an incentive to upgrade their units for higher rents. In weak markets, owners have an incentive to no longer maintain their property when rent revenue does not cover operating costs.

## The Housing Trust Fund

In addition to raising the minimum wage, public investments in housing programs are essential to address the shortage of rental housing affordable and available to ELI and VLI households. One new and promising tool for addressing this shortage is the national Housing Trust Fund (HTF).

The HTF is the first new federal housing program in a generation to focus on ELI households. It will receive a first time allocation of nearly \$173.6 million in the summer of 2016 for distribution to the 50 states and the District of Columbia. At least 90% of HTF funds must be used to build, preserve, or rehabilitate rental housing affordable to ELI and VLI households. A maximum of ten percent of HTF funds can be used for affordable homeownership activities. At least 75% of funds must benefit ELI households, and up to 25% can benefit VLI households. While the HTF is capitalized under \$1 billion, all funds must benefit ELI households.

The HTF is funded through a dedicated source of revenue outside of the annual appropriations process. The dedicated revenue source is a 4.2 basis point (0.042%) assessment on the new business of Fannie Mae and Freddie

Mac. Sixty-five percent of this revenue is directed to the HTF and 35% is directed to the Capital Magnet Fund (CMF). Ideally, a dedicated revenue source means that HTF funds supplement rather than compete with existing housing programs funded through annual appropriations.

The HTF can capture additional revenue to meet the housing needs of the nation's lowest income renters. A number of revenue sources have been proposed, including expanding the contributions of Fannie Mae and Freddie

Mac. An effort to reform the two GSEs voted out of the Senate Committee on Banking, Housing, and Urban Affairs (S. 1217) on a bipartisan basis would have resulted in \$3.5 billion a year for the HTF.<sup>13</sup>

To date, three of four housing finance reform bills have included language to preserve and expand a dedicated stream of revenue for the HTF

Ranking Member of the House Committee on Financial Services, Maxine Waters (D-CA), introduced legislation on March 23, 2016 to provide \$1 billion annually in mandatory spending in perpetuity to the HTF. The Ending Homelessness Act of 2016 (H.R. 4888) also includes \$50 million per year in project based rental assistance for HTF units, an additional \$5 billion for permanent supportive housing targeted to the chronically homeless, \$2.5 billion for vouchers targeted to homeless families and individuals, and \$500 million for outreach to the homeless. The bill has been referred to the House Committee on Financial Services and the House Committee on the Budget.<sup>14</sup>

over 10 years for the HTF.<sup>15</sup> The campaign proposes reducing the mortgage amount eligible for the interest deduction from \$1 million to \$500,000 and converting the deduction to a 15% non-refundable tax credit. Representative Keith Ellison (D-MN) introduced the Common Sense Housing Investment Act of 2015 (H.R. 1662) on March 26, 2015 that includes these two MID provisions.<sup>16</sup> The bill directs sixty percent of the reform’s savings to the HTF and the remainder to the Public Housing Capital Fund, the Section 8 program, and the Low Income Housing Tax Credit (LIHTC).

## Conclusion

*Out of Reach 2016* highlights the affordability gap between the cost of rental housing and the wages of millions of renters who do not earn enough to afford a decent and safe home without significant sacrifice. Low income renters face the greatest challenge. Higher wages and a greater supply of affordable rental housing are necessary. If we make further gains in minimum wage legislation and expand funding for the national Housing Trust Fund, we can address the affordability gap.

Administration. See [Appendix A](#) for a detailed explanation of data sources and methodologies.

The Housing Wage is based on HUD FMRs, which are the Department’s best estimate of what a household seeking a modest rental unit can expect to pay for rent and utilities in the current market. The FMR is an estimate of what a family moving today can expect to pay for a modest rental home, not what current renters are paying on average. The FMR is the basis for the rent payment standard for Housing Choice Vouchers and other HUD programs. They are applied uniformly within each FMR area, which is either a metropolitan region or nonmetropolitan county.<sup>17</sup> This approach fails to account for rent variation within an FMR area.

HUD has developed hypothetical small area fair market rents (SAFMRs) based on U.S. Postal Service ZIP codes in metropolitan areas to better reflect small-scale market conditions within metropolitan regions. HUD asked for comments on using SAFMRs for Housing Choice Voucher payment standards in certain metropolitan areas last summer and sent a proposed rule to the Office of Management and Budget (OMB) on February 9, 2016. OMB is reviewing the rule. NLIHC has long supported SAFMRs within the voucher program.

NLIHC is examining SAFMRs as a tool to estimate the Housing Wage at a more local scale within metropolitan areas. Table 2 compares the Housing Wage for the San Francisco HUD Metro FMR

17 Exceptions are the Dallas, TX HMFA and five public housing authorities participating in the Small Area FMR Demonstration Program.

Area (HMFA) to the housing wage for places within the San Francisco HMFA. NLIHC is exploring how best to use SAFMRs within metropolitan regions to reflect local area housing wages.

Readers are cautioned against comparing statistics in one edition of *Out of Reach* with those in another. In recent years, HUD has changed its methodology for calculating FMRs and incomes. Since 2012, HUD has developed FMR estimates using American Community Survey (ACS) data to determine base rents, rather than data from the Census Bureau's Decennial Survey. The new methodology can introduce more year-to-year variability in FMRs. For this reason and others (e.g., changes to the metropolitan area definitions), readers should not compare this year's report to previous editions of *Out of Reach* and assume that all differences reflect actual market dynamics.

Please consult the appendices and NLIHC research staff for assistance interpreting changes in the data.

# HOW TO USE THE NUMBERS

A renter household needs to earn at least \$20.30 per hour in order to afford a two-bedroom unit at FMR.

For a family earning 100% of AMI, monthly rent of \$1,690 or less is affordable.

The annual median family income (AMI) in the United States is \$67,593 (2016).

Renter households represented 36% of all households in the United States (2010-2014).

There were 41,802,847 renter households in the United States (2010-2014).

The estimated mean (average) renter wage in the United States is \$15.42 per hour (2016).

The FMR for a two-bedroom rental unit in the United States is \$1,056 (2016).

A renter household needs an annual income of \$42,240 in order to afford a two-bedroom rental unit at FMR.

A renter household needs 2.8 full-time jobs paying the minimum wage in order to afford a two-bedroom rental unit at FMR.

In the United States, an extremely low income family (30% of AMI) earns \$20,278 annually.

For a family earning 30% of AMI, monthly rent of \$507 or less is affordable.

If a household earns the mean renter wage, monthly rent of \$802 or less is affordable.

A renter household needs 1.3 full-time jobs paying the mean renter wage in order to afford a two-bedroom rental unit at FMR.

- 1: BR = Bedroom.
- 2: FMR = Fiscal Year 2016 Fair Market Rent (HUD, 2016).
- 3: This calculation uses the higher of the state or federal minimum wage. Local minimum wages are not used. See Appendix A.
- 4: AMI = Fiscal Year 2016 Area Median Income (HUD, 2016).
- 5: "Affordable" rents represent the generally accepted standard of spending no more than 30% of gross income on rent and utilities.

# WHERE THE NUMBERS COME FROM

Divide income needed to afford FMR (\$42,240) by 52 (weeks per year) and then by 40 (hours per work week) (\$42,240 / 52 = \$812; \$812 / 40 = \$20.30).

Multiply Annual AMI by .3 to get maximum amount that can be spent on housing for it to be affordable (\$67,593 x .3 = \$20,278). Divide by 12 to obtain monthly amount (\$20,278 / 12 = \$1,690).

HUD FY16 estimated median family income based on data from the American Community Survey (ACS). See Appendix A

Divide number of renter households by total number of households (ACS 2010-2014) (41,802,847 / 117,452,309 = .36). Then multiply by 100 (.36 x 100 = 36%).

ACS (2010-2014).

Average wage reported by the Bureau of Labor Statistics (BLS) for 2014, adjusted to reflect the income of renter households relative to all households in the United States, and projected to 2016. See Appendix A.

Developed by HUD annually (2016). See Appendix A.

Multiply the FMR by 12 to get yearly rental cost (\$1,056 x 12 = \$12,672). Then divide by .3 to determine the total income needed to afford \$12,660 per year in rent (\$12,672 / .3 = \$42,240).

Divide income needed to afford the FMR by 52 (weeks per year) (\$42,200 / 52 = \$812). Then divide by \$7.25 (the Federal minimum wage) (\$812 / \$7.25 = 112 hours). Finally, divide by 40 (hours per work week) (112 / 40 = 2.8 full-time jobs).

Multiply Annual AMI by .3 (\$67,857 x .3 = \$20,278).

Multiply 30% of Annual AMI by .3 to get maximum amount that can be spent on housing for it to be affordable (\$20,278 x .3 = \$6,083). Divide by 12 to obtain monthly amount (\$6,083 / 12 = \$507).

Calculate annual income by multiplying mean renter wage by 40 (hours per week) and 52 (weeks per year) (\$15.42 x 40 x 52 = \$32,073). Multiply by .3 to determine maximum amount that can be spent on rent (\$32,073 x .3 = \$9,622). Divide by 12 to obtain monthly amount (\$9,622 / 12 = \$802)

Divide income needed to afford the FMR by 52 (weeks per year) (\$42,240 / 52 = \$812). Then divide by \$15.42 (The United States' mean renter wage) (\$812 / \$15.42 = 53 hours). Finally, divide by 40 (hours per work week) (53 / 40 = 1.3 full-time jobs).

3 HMFA = HUD Metro Fair Market Rent (FMR) Area. This term indicates that a portion of the Office of Management & Budget (OMB) defined core-based statistical is in the area to which the income limits and FMRs apply. HUD is required by OMB to alter the name of the metropolitan geographic entities it derives from the Core Based Statistical Area (CBSA) when the geography is not the same as that established by the OMB.

4 MSA = Metropolitan Statistical Area. Geographic entities defined by OMB for use by the federal statistical agencies in collecting, tabulating, and publishing federal statistics. A metro area contains an urban core of 50,000 or more in population.

# 2016 TWO-BEDROOM RENTAL UNIT HOUSING WAGE

Represents the hourly wage that a household must earn (working 40 hours a week, 52 weeks a year) in order to afford the Fair Market Rent for a two-bedroom rental unit, without paying more than 30% of their income.

# 2016 HOURS AT MINIMUM WAGE NEEDED TO AFFORD RENT

In no state can a minimum wage worker afford a **ONE-BEDROOM** rental unit at the average Fair Market Rent, working a standard 40-hour work week, without paying more than 30% of their income.

**Hours needed at minimum wage to afford a one-bedroom unit**

60 hours per week or less
  61 to 78 hours per week
  79 hours per week or more

\*This state's minimum wage exceeds the federal minimum wage

1: BR = Bedroom.

2: FMR = Fiscal Year 2016 Fair Market Rent (HUD, 2016).

3: This calculation uses the higher of the state or federal minimum wage. Local minimum wages are not used. See [Appendix A](#).

4: AMI = Fiscal Year 2016 Area Median Income (HUD, 2015).

5: "Affordable" rents represent the generally accepted standard of spending no more than 30% of gross income on rent and utilities.

# ALABAMA

In Alabama, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$724**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,414** monthly or **\$28,973** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$13.93** PER HOUR

In Arkansas, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$689**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,298** monthly or **\$27,572** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$13.26** PER HOUR

In California, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$1,487**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$4,955** monthly or **\$59,464** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$28.59** PER HOUR

# COLORADO

STATE RANKING  
**14\***

In Colorado, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$1,098**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$3,662** monthly or **\$43,939** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$21.12** PER HOUR

1: BR = Bedroom

2: FMR = Fiscal Year 2016 Fair Market Rent (HUD, 2016)

3: This calculation uses the higher of the state or federal minimum wage. Local minimum wages are not used. See Appendix A.

4: AMI = Fiscal Year 2016 Area Median Income

5: "Affordable" rents represent the generally accepted standard of spending not more than 30% of gross income on gross housing costs.

# GEORGIA

In Georgia, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$848**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,826** monthly or **\$33,908** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$16.30** PER HOUR

# ILLINOIS

In Illinois, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$1,039**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$3,464** monthly or **\$41,567** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$19.98** PER HOUR

# INDIANA

In Indiana, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$772**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,572** monthly or **\$30,868** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$14.84** PER HOUR

# IOWA

In Iowa, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$730**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,432** monthly or **\$29,183** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$14.03** PER HOUR

STATE RANKING  
**35\***

In Kansas, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$781**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,602** monthly or **\$31,221** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$15.01** PER HOUR

STATE RANKING

45\*

In Kentucky, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$733**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,443** monthly or **\$29,319** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$14.10** PER HOUR

# LOUISIANA

In Louisiana, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$822**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,741** monthly or **\$32,891** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$15.81** PER HOUR

In Maine, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$886**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,954** monthly or **\$35,453** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$17.04** PER HOUR

In Michigan, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$812**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,708** monthly or **\$32,494** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$15.62** PER HOUR

In Minnesota, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$924**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$3,078** monthly or **\$36,941** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$17.76** PER HOUR

# MISSISSIPPI

In Mississippi, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$732**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,439** monthly or **\$29,268** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$14.07** PER HOUR

In Missouri, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$779**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,596** monthly or **\$31,158** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$14.98** PER HOUR

# MONTANA

STATE RANKING

40\*

In Montana, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$759**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,530** monthly or **\$30,361** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$14.60** PER HOUR

STATE  
RANKING

42\*

In Nebraska, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$751**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,505** monthly or **\$30,058** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$14.45** PER HOUR

# NEW YORK

In New York, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$1,388**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$4,626** monthly or **\$55,508** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$26.69** PER HOUR

# NORTH CAROLINA

In North Carolina, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$796**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,655** monthly or **\$31,859** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$15.32** PER HOUR

STATE RANKING

31\*

In North Dakota, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$814**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,714** monthly or **\$32,565** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$15.66** PER HOUR

# OHIO

In Ohio, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$751**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,505** monthly or **\$30,060** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$14.45** PER HOUR

STATE RANKING

43\*

In Oklahoma, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$745**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,483** monthly or **\$29,796** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$14.33** PER HOUR

# OREGON

In Oregon, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$1,008**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$3,360** monthly or **\$40,318** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$19.38** PER HOUR

# PENNSYLVANIA

In Pennsylvania, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$950**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$3,167** monthly or **\$38,000** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$18.27** PER HOUR

# PUERTO RICO

STATE RANKING

52\*

In Puerto Rico, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$498**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$1,661** monthly or **\$19,930** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$9.58** PER HOUR

# RHODE ISLAND

In Rhode Island, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$991**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$3,303** monthly or **\$39,639** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$19.06** PER HOUR

STATE RANKING

49\*

In South Dakota, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$716**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,386** monthly or **\$28,631** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$13.77** PER HOUR

STATE RANKING

36\*

In Tennessee, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$779**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,598** monthly or **\$31,175** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$14.99** PER HOUR

# TEXAS

In Texas, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$915**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$3,051** monthly or **\$36,611** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$17.60** PER HOUR

# UTAH

In Utah, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$849**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,829** monthly or **\$33,944** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$16.32** PER HOUR

# WASHINGTON

In Washington, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$1,203**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$4,010** monthly or **\$48,119** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$23.13** PER HOUR

# WEST VIRGINIA

In West Virginia, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$685**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,282** monthly or **\$27,390** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$13.17** PER HOUR

# WISCONSIN

In Wisconsin, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$828**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,760** monthly or **\$33,115** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$15.92** PER HOUR

STATE RANKING

33\*

In Wyoming, the Fair Market Rent (FMR) for a two-bedroom apartment is **\$812**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **\$2,707** monthly or **\$32,489** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of:

 **\$15.62** PER HOUR

# APPENDIX A: DATA NOTES, METHODOLOGIES, AND SOURCES

Appendix A describes the data and methodology of *Out of Reach*. Each subject includes a description and link to the primary data source. In some instances, supplementary material is also cited. Information on how to calculate and interpret the data can be found in the sections “How to Use the Numbers,” and “Where the Numbers Come From,” which immediately follow the reports’ introduction.

## FAIR MARKET RENT AREA DEFINITIONS

Each year, HUD determines Fair Market Rents (FMRs) for metropolitan and rural housing markets across the country. In metropolitan areas, HUD tries to use the most current Office of Management and Budget (OMB) metropolitan area definitions to define housing market boundaries for FMRs. Since FMR areas are meant to reflect cohesive housing markets, adopting the OMB definitions is not always preferable. Also, significant changes to area definitions can affect current housing assistance recipients. In keeping with OMB’s guidance to federal agencies, HUD modifies the OMB boundaries in some instances for purposes of program administration.

HUD’s FY06 FMR areas incorporated OMB’s 2003 overhaul of metropolitan area definitions. HUD used OMB’s new definitions, but modified them if a county (or town) to be added to an FMR area under those definitions had rents or incomes in 2000 that deviated more than 5% from the newly defined metropolitan area. HUD (and *Out of Reach*) refers to unmodified OMB-defined areas as Metropolitan Statistical Areas (MSAs) and HUD-modified areas as HUD Metro FMR Areas (HMFAs). OMB’s subsequent changes to metropolitan area definitions through 2009 were incorporated into HUD’s subsequent FMR areas.

OMB released new metropolitan area definitions in February 2013. HUD elected to apply pre-2013 definitions to FY16 FMR areas except where the post-2013 definitions resulted in a smaller FMR area. Counties that had been removed from metropolitan areas were treated by HUD as nonmetropolitan counties. Counties that had been added to metropolitan areas were treated by HUD as metropolitan subareas (HMFAs) and given their own FMR if local rent data were statistically reliable. New multi-county metropolitan areas were treated by HUD as individual county metropolitan subareas (HMFAs) if the data were statistically reliable. This is consistent with HUD’s objective to maximize tenant choice by allowing FMRs to vary locally. These changes resulted in more metropolitan areas listed in *Out of Reach 2016*.

In cases in which an FMR area crosses state lines, this report provides an entry for the area under both states. While the Housing Wage, FMR, and Area Median Income (AMI) values apply to the entire FMR area and will be the same in both states, other data such as the number of renter households and the minimum and renter wages apply only to the portion of the FMR area within that state’s borders.

## FAIR MARKET RENTS

The FY16 FMRs are based on special tabulations of 2009-2013 American Community Survey (ACS) data. Base rents that provide the 40<sup>th</sup> and 50<sup>th</sup> percentile of standard quality rents are determined using the standard quality two-bedroom gross rent estimates from the five-year ACS data. The estimate is considered reliable if its margin of error is less than 50% of the estimate. If an FMR area does not have a reliable estimate from the 2009-2013 ACS data, then the most recent reliable estimate from the past five years is updated by the change in the corresponding State metropolitan or non-metropolitan area from the year of the most reliable estimate to 2009. If the FMR area does not have a reliable estimate in the past five years, then the State metropolitan area or non-metropolitan area estimate is the base for FY16 FMRs.

A recent mover adjustment factor is applied to the base rent. This factor is calculated as the percentage change between the five-year 2009-2013 40<sup>th</sup> percentile standard quality two-bedroom gross rent, and the one-year 2013 40<sup>th</sup> percentile recent mover two-bedroom gross rent. HUD does not allow recent mover factors to lower the base rent. The data represent the smallest geographic area containing the FMR area where the gross rent is statistically reliable.

Local area rent survey results are used as base rents when the local survey indicates rents statistically different from the ACS-based rents. For FY16 FMRs, the ACS is not used as the base rent or recent mover factors in eight FMR areas. HUD currently does not have funds to conduct local surveys, and so future surveys must be paid for by the public housing agencies.

A CPI update factor is applied to the ACS base rent to adjust for inflation through 2014 using local or regional CPI data.<sup>1</sup> A trend factor is then applied to trend the gross rent forward to 2016. HUD trended the final FY16 FMRs forward with national forecasts of the rent and utility components of the CPI. The trend factor is the weighted average change between the most recent annual Rent of Primary Residence and Utility CPIs and the same indices forecasted to the relevant fiscal year. The trend factor applied to the final FY16 FMRs was 1.0457.<sup>2</sup>

While the *Out of Reach* printed book highlights the two-bedroom FMR, the online version includes a broader data set covering the zero- to four-bedroom FMRs. The focus on the two-bedroom FMRs reflects HUD methodology. HUD finds that two-bedroom rental units are most common and the most reliable to survey, so the two-bedroom units are utilized as the primary FMR estimate.

1 Documentation on the development of the FMR for each county and metropolitan area is available at <http://www.huduser.org/portal/datasets/fmr.html>.

2 Detailed documentation on the trend factor for FY16 is available at [https://www.huduser.org/portal/datasets/fmr/fmrs/FY2016\\_code/alt\\_trend.odn](https://www.huduser.org/portal/datasets/fmr/fmrs/FY2016_code/alt_trend.odn).

HUD uses the two-bedroom FMR estimates and bedroom-size rent ratios to calculate FMRs for units of other sizes. HUD makes additional adjustments for units with three or more bedrooms to increase the likelihood that the largest families, who have the most difficulty in finding units, will be successful in finding eligible program units.

Due to changes in FMR methodology over the years, we do not recommend comparing *Out of Reach* with previous editions, particularly editions prior to the use of the American Community Survey (ACS).

HUD provides online PDF and Excel files that list the counties (and New England towns, where applicable) included in each FMR area and their FY16 FMRs. These resources are available at [www.huduser.org/datasets/fmr.html](http://www.huduser.org/datasets/fmr.html).

HUD's Notice of FY16 FMRs is available at [https://www.huduser.gov/portal/datasets/fmr/fmr2016/FY2016\\_Final\\_FMRs\\_preamble.pdf](https://www.huduser.gov/portal/datasets/fmr/fmr2016/FY2016_Final_FMRs_preamble.pdf).

## 40<sup>TH</sup> AND 50<sup>TH</sup> PERCENTILE FMR DESIGNATION

HUD's regulations at 24 CFR 888.113 require it to set FMRs at the 50<sup>th</sup> percentile rent, rather than the 40<sup>th</sup>, for metropolitan areas that contain geographically concentrated voucher recipients. This rule was established to raise the voucher payment standard and expand rental options in higher opportunity locations for housing voucher holders. Once designated, the FMR area retains its 50<sup>th</sup> percentile rent for three years, at which time HUD reviews it for continuing eligibility. FMR areas are removed from the program if after three years they fail to show gains in deconcentration or graduate from the program.

In FY15, 16 FMR areas were using 50<sup>th</sup> percentiles. Six were eligible for review. Two of the six did not show deconcentration over the three-year period and are not eligible for 50<sup>th</sup> percentile status again until 2019. One area graduated from the 50<sup>th</sup> percentile program. One FMR area was added to the program.

Fourteen FMR areas have 50<sup>th</sup> percentile designation for FY16. An asterisk (\*) is used to denote these FMR areas in *Out of Reach*.

The last page in this appendix lists the FMR areas currently eligible for the 50<sup>th</sup> percentile FMR.

## NATIONAL, STATE, AND NON-METRO FAIR MARKET RENTS

HUD calculates FMRs for metropolitan areas and nonmetropolitan counties, but not for states, combined nonmetropolitan areas, or the nation. The FMRs for these larger geographies provided in *Out of Reach* are calculated by NLIHC and reflect the weighted average FMR for the counties included in the larger geography. The weight for FMRs is the number of renter households within each county from the 2010-2014 ACS.

## AREA MEDIAN INCOME (AMI)

This edition of *Out of Reach* uses HUD's FY16 AMIs. HUD calculates the family AMI for metropolitan areas and nonmetropolitan counties. The Census definition of "family" is two or more persons related by blood, marriage or adoption residing together. This family AMI relates to all families and is not intended to apply to a specific family size.

In 2011, HUD updated its methodology to calculate family AMIs due to the availability of five-year ACS data. That year, HUD discontinued use of Census 2000 data in the production of FY11 AMIs.

The 2009-2013 ACS data are used to calculate the FY16 AMIs. In areas with statistically reliable one-year 2013 ACS data, HUD incorporates the more recent data. HUD's standard for statistically reliable data is a margin of error of less than 50% of the estimate.

The Congressional Budget Office (CBO) projection of the Consumer Price Index (CPI), published in January 2016, is used by HUD to inflate the ACS estimate from 2013 to the mid-point of FY16.

Applying the assumption that no more than 30% of income should be spent on housing costs (see below), *Out of Reach* calculates the maximum affordable rent for households earning the median income and 30% of the median (extremely low income). This is a straight percentage and does not include HUD's adjustments for income limits for federal housing programs.

The median incomes for states and combined nonmetropolitan areas reported in *Out of Reach* reflect the weighted average of county AMI data weighted by the total number of households provided by 2010-2014 ACS.

FY16 family AMI for metropolitan areas and nonmetropolitan counties, the methodology, and HUD's adjustments to subsequent income limits are provided in *FY2016 HUD Income Limits Briefing Material*, available at <https://www.huduser.gov/portal/datasets/il/il16/IncomeLimitsBriefingMaterial-FY16.pdf>.

## AFFORDABILITY

*Out of Reach* is consistent with federal housing policy in the assumption that no more than 30% of a household's gross income should be consumed by gross housing costs. Spending more than 30% of income on housing is considered "unaffordable."<sup>3</sup>

Although *Out of Reach* addresses affordability in the rental housing market, housing problems are not unique to renters. *The State of the Nation's Housing: 2015*, published by Harvard University's Joint Center for Housing Studies (<http://www.jchs.harvard>).

<sup>3</sup> The Housing and Urban-Rural Recovery Act of 1983 made the 30% "rule of thumb" applicable to rental housing assistance programs. See Pelletiere, D. (2008). *Getting to the heart of housing's fundamental question: How much can a family afford?* Washington, D.C.: National Low Income Housing Coalition.

## PREVAILING MINIMUM WAGE

The federal minimum wage on January 1, 2016 was \$7.25 per hour. According to data from the U.S. Department of Labor, the District of Columbia and 29 states had a state minimum wage higher than the federal level on January 1, 2016. In place of the lower federal rate, *Out of Reach* incorporates the prevailing minimum wage in these states. *Out of Reach* incorporates the minimum wage in effect *at the time of publication*. Some local municipalities have a minimum wage that is higher than the prevailing federal or state rate, but this local rate is not fully incorporated into *Out of Reach* data.

Among the statistics included in *Out of Reach* are the number of hours and subsequent full-time jobs a minimum wage earner must work to afford the FMR. If the reader would like to calculate the same statistics using a different wage such as a higher local minimum wage, a simple formula can be used for the conversion:

$$\frac{[\text{hours or jobs at the published wage}] \times [\text{published wage}]}{[\text{alternative wage}]}$$

For example, one would have to work 176 hours per week to afford the two-bedroom FMR in San Francisco if the minimum wage in that location was equivalent to California's rate of \$10.00. However, the same FMR would be affordable in 144 hours under the higher local minimum wage of \$12.25<sup>4</sup> ( $176 \times \$10.00 / \$12.25$ ). For further guidance, see "Where the Numbers Come From" or contact NLIHC research staff.

The Department of Labor ([www.dol.gov/whd/minwage/america.htm](http://www.dol.gov/whd/minwage/america.htm)) provides further information on state minimum wage laws.

## AVERAGE RENTER WAGE

Recognizing that the minimum wage reflects the earnings of only the lowest income workers, *Out of Reach* also calculates an estimated mean renter hourly wage. This measure reflects the compensation that a typical renter is likely to receive for an hour of work by dividing average weekly earnings by 40 hours, thus assuming a full-time workweek. Earnings include several non-wage forms of compensation like paid leave, bonuses, tips, and stock options.<sup>5</sup>

5 Please note this measure is different from renter median household income, which reflects an estimate of what renter households are earning today and includes income not earned in relation to employment.

The estimated mean renter hourly wage is based on the average weekly earnings of private (non-governmental) employees working in each county.<sup>6</sup> Renter wage information is based on 2014 data reported by the BLS in the Quarterly Census of Employment and Wages. For each county, mean hourly earnings are multiplied by the ratio of median renter household income to median income of all households in the American Community Survey (2010-2014) to arrive at an estimated average renter wage. In eighteen counties nationwide, the median renter household income exceeds the median household income. Nationally, the median renter household earned an average of 62% of the overall median household income.

An inflation factor was applied to inflate the estimated mean renter hourly wage based on 2014 data to 2016. The inflation factor (239.1 ÷ 236.712) was based on the CBO forecast of the national CPI for FY2016. HUD used this methodology for the 2016 AMI estimates.

In approximately 7.7% of counties, the renter wage is below the federal minimum wage. One likely explanation is that workers in these counties average fewer than 40 hours per week, but the mean renter wage calculation assumes weekly compensation is the product of a full-time work week. For example, mistakenly assuming earnings from 20 hours of work were the product of a full-time workweek would underestimate the actual hourly wage by half, but it would still accurately reflect the true earnings under the assumption of a full-time schedule (see next section).

Wage data from the Quarterly Census of Employment and Wages are available through the Bureau of Labor Statistics at [www.bls.gov/cew/home.htm](http://www.bls.gov/cew/home.htm).

## WORKING HOURS

Calculations of the Housing Wage and of the number of jobs required at the minimum wage or mean renter wage to afford the FMR assume that an individual works 40 hours per week, 52 weeks each year, for a total of 2,080 hours per year. Seasonal employment, unpaid sick leave, temporary lay-offs, job changes, and other leave prevent many individuals from maximizing their earnings throughout the year. According to Current Employment Statistics for March 2016, the average wage earner in the U.S. worked 34.4 hours per week.<sup>7</sup>

Not all employees have the opportunity to translate an hourly wage into full-time, year-round employment. For these workers, the Housing Wage underestimates the actual hourly compensation needed to afford the FMR. Conversely, some households include multiple wage earners or single individuals that average more than 40 hours per week at work. For these households, a home renting at the FMR would be affordable even if each worker earned less than the area's stated Housing Wage, as long as their combined wages exceed the Housing Wage.

6 Renter wage data for 9 counties are not provided in *Out of Reach* either because the BLS could not disclose the data for confidentiality reasons or because the number of employees working in the county was insufficient to estimate a reliable wage.

## SUPPLEMENTAL SECURITY INCOME (SSI)

*Out of Reach* compares rental housing costs with the rent affordable to individuals receiving Supplemental Security Income (SSI) payments. The numbers are based on the maximum federal SSI payment for individuals in 2016, which is \$733 per month. *Out of Reach* calculations also include supplemental payments that benefit all individual SSI recipients in 19 states where the Social Security Administration (SSA) reports the supplemental payment amount. These amounts are available at <https://secure.ssa.gov/apps10/poms.nsf/lnx/0502302200>.

Supplemental payments provided by an additional 27 states and the District of Columbia are excluded from *Out of Reach* calculations. For some, these payments are administered by the SSA but are available only to populations with specific disabilities, in specific facilities, or in specific household settings. For the majority, however, the supplements are administered directly by the states, so the data are not readily available if they haven't been reported to the SSA. The only four states that do not supplement federal SSI payments are Arizona, North Dakota, Mississippi, and West Virginia. Residents of Puerto Rico cannot receive federal SSI payments.

Since SSI payments are set at the state level, the published version of *Out of Reach* illustrates the difference between each state's average two-bedroom FMR and the rent that is affordable for SSI recipients. Readers can calculate this gap for any geography by subtracting the rent affordable to an SSI recipient from the area's FMR.

Information on SSI payments is available through the Social Security Administration at <https://www.ssa.gov/OACT/COLA/SSI.html> and <https://www.ssa.gov/pubs/>.

The Technical Assistance Collaborative, Inc., publishes a biennial report comparing Fair Market Rents with the incomes of SSI recipients. Recent editions of *Priced Out* can be found at <http://www.tacinc.org/knowledge-resources/publications/>.

## ADDITIONAL DATA AVAILABLE ONLINE

The print version of *Out of Reach* contains limited data in an effort to present the most important information clearly. Additional data can be found online at <http://www.nlihc.org>.

The *Out of Reach* methodology was developed by Cushing N. Dolbeare, founder of the National Low Income Housing Coalition.

## ELIGIBILITY FOR 50<sup>TH</sup> PERCENTILE FAIR MARKET RENT

In FY16, Fair Market Rents (FMRs) were set at the 50<sup>th</sup> percentile rent in 14 FMR areas where voucher tenants were concentrated in low opportunity areas. Compared with the typical 40<sup>th</sup> percentile rent, this higher voucher payment standard can provide tenants with a broader range of housing opportunities.
