

NLIHC's HoUSed Campaign for  
Long-Term Housing Solutions

March 14, 2022

# Agenda

## **Welcome & Updates**

- Paul Kealey, NLIHC

## **FY22 Spending Bill & Budget Reconciliation Updates**

- Kim Johnson, NLIHC

## **Conclusions from Preliminary Analysis of Eviction Filing Patterns in 2021**

- Anne Kat Alexander, Emily Lemmerman, & Joe Fish, Eviction Lab at Princeton University

## **Findings from HUD's 2021 Annual Homelessness Assessment Report**

- Meghan Henry, Tanya de Sousa, Anna Robinson, Abt Associates

## **Lessons from New NLIHC/UPenn Report on ERA**

- Rebecca Yae, NLIHC
- Claudia Aiken, Housing Initiative at Penn

## **Latest ERA Spending Numbers Through January**

- Sophie Siebach-Glover, NLIHC

## **Field Updates**

- Robyn Powell, New Mexico Mortgage Finance Authority
- Brad Hirn, Housing Rights Committee of San Francisco
- Kim McCarthy, Community Alliance of Tenants

## **Next Steps**

# U.S. Eviction Filing Patterns in 2021

March 14, 2022

Anne Kat Alexander, Joe Fish, Emily Lemmerman

Eviction Lab at Princeton University

# Eviction Tracking System (ETS)

- 31 cities and 6 states
- 1 in 4 renters lives in an ETS site
- weekly eviction filings
- compares volume to "historical average": # of filings for that period in one or more typical years

# U.S. Eviction Filing Patterns in 2020

Peter Hepburn, Renee Louis, Joe Fish, Emily Lemmerman, Anne Kat Alexander, Timothy A. Thomas, Robert Koehler, Emily Benfer, and Matthew Desmond  
The Eviction Lab

# Preliminary Analysis: 11 months of the CDC Moratorium

Jasmine Rangel, Jacob Haas, Emily Lemmerman, Joe Fish, and Peter Hepburn  
The Eviction Lab

# Preliminary Analysis: Eviction Filing Trends After the CDC Moratorium Expiration

Jacob Haas, Jasmine Rangel, Juan Pablo Garnham, and Peter Hepburn  
Princeton University

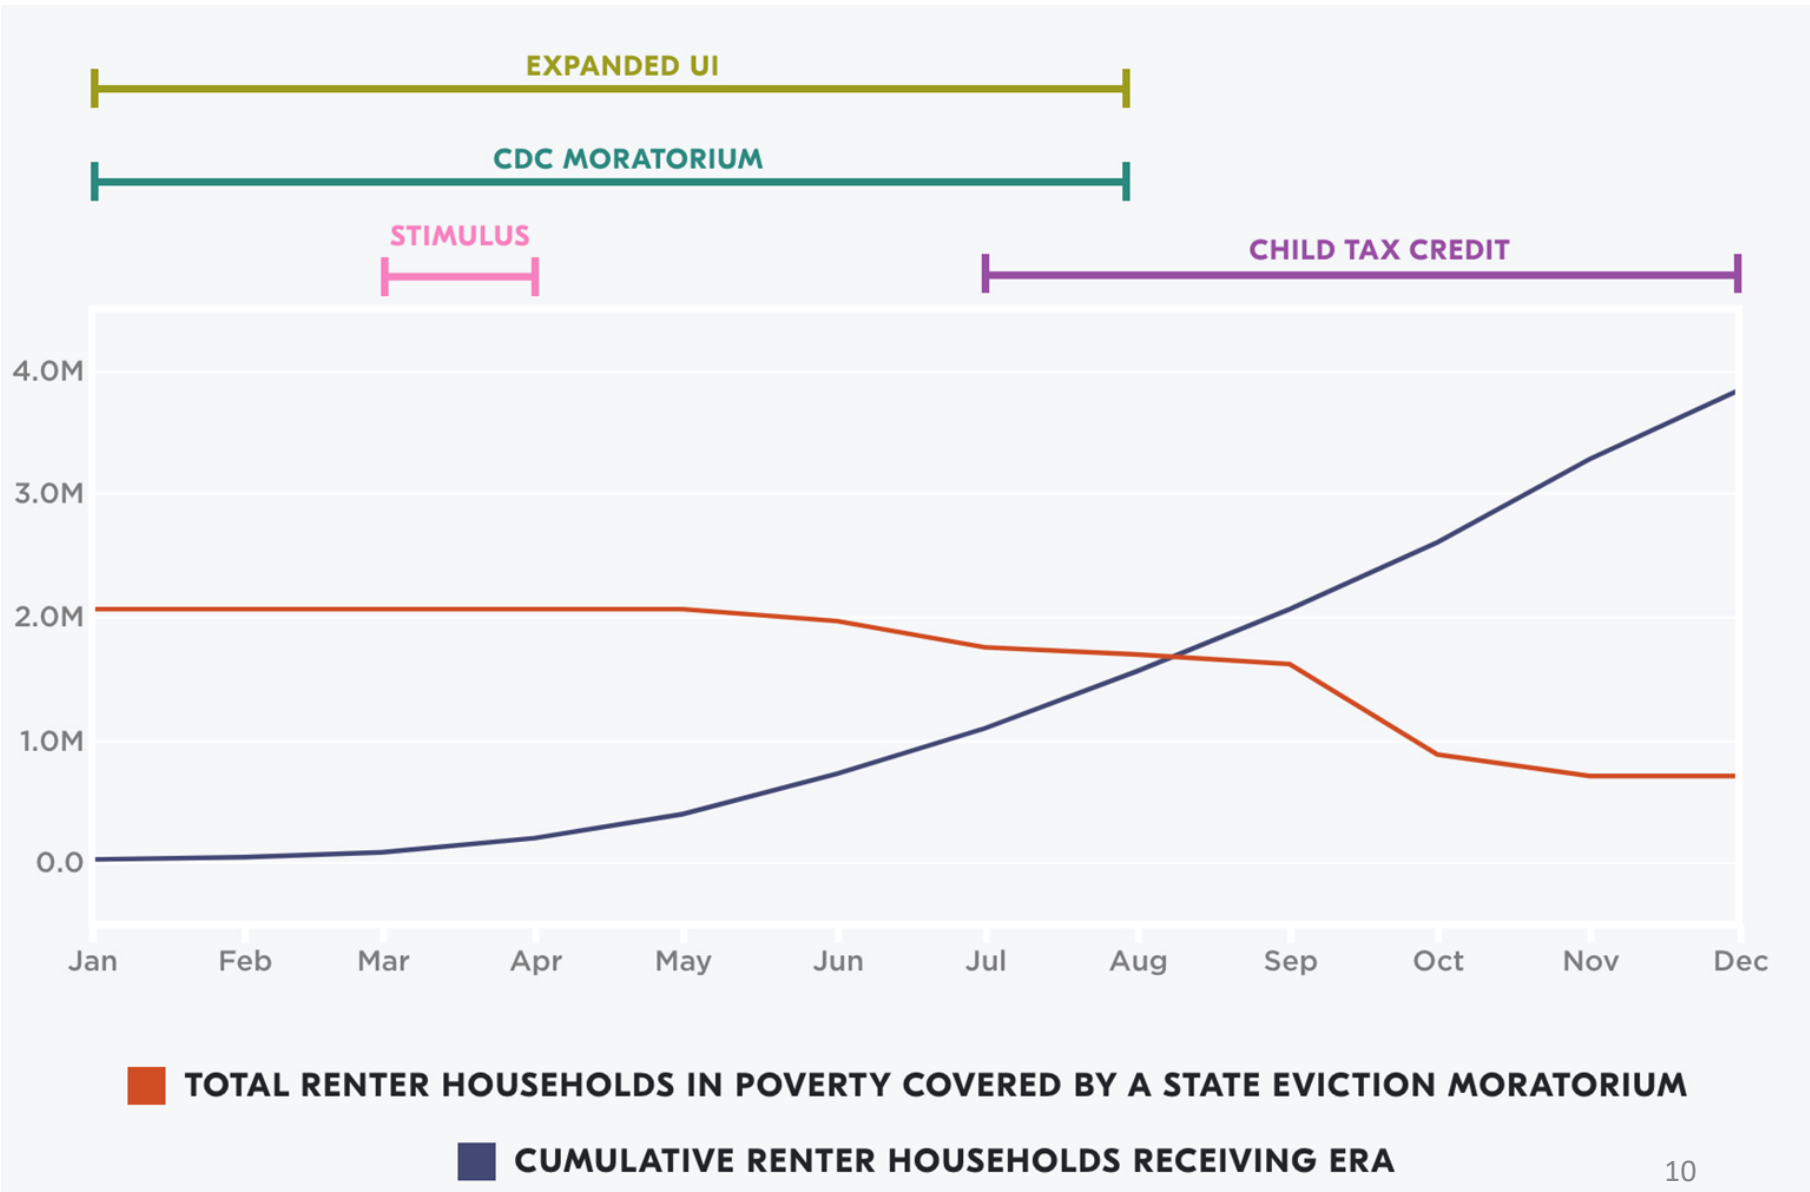

# Findings preview

- Estimated **1.36 million eviction cases** averted nationwide
  - Conservative estimate based on typical year eviction volume - does not account for increased financial stress during the pandemic
  - Over **3 million cases averted during the pandemic**
- Greatest reductions in low-income and majority-Black neighborhoods
- Reductions vary by jurisdiction, over the course of the year, and depending on neighborhood demographics

\*\* not a causal analysis, formal evictions only

# Policy context: emergency expansion of safety net

# Filings remain down but are trending up

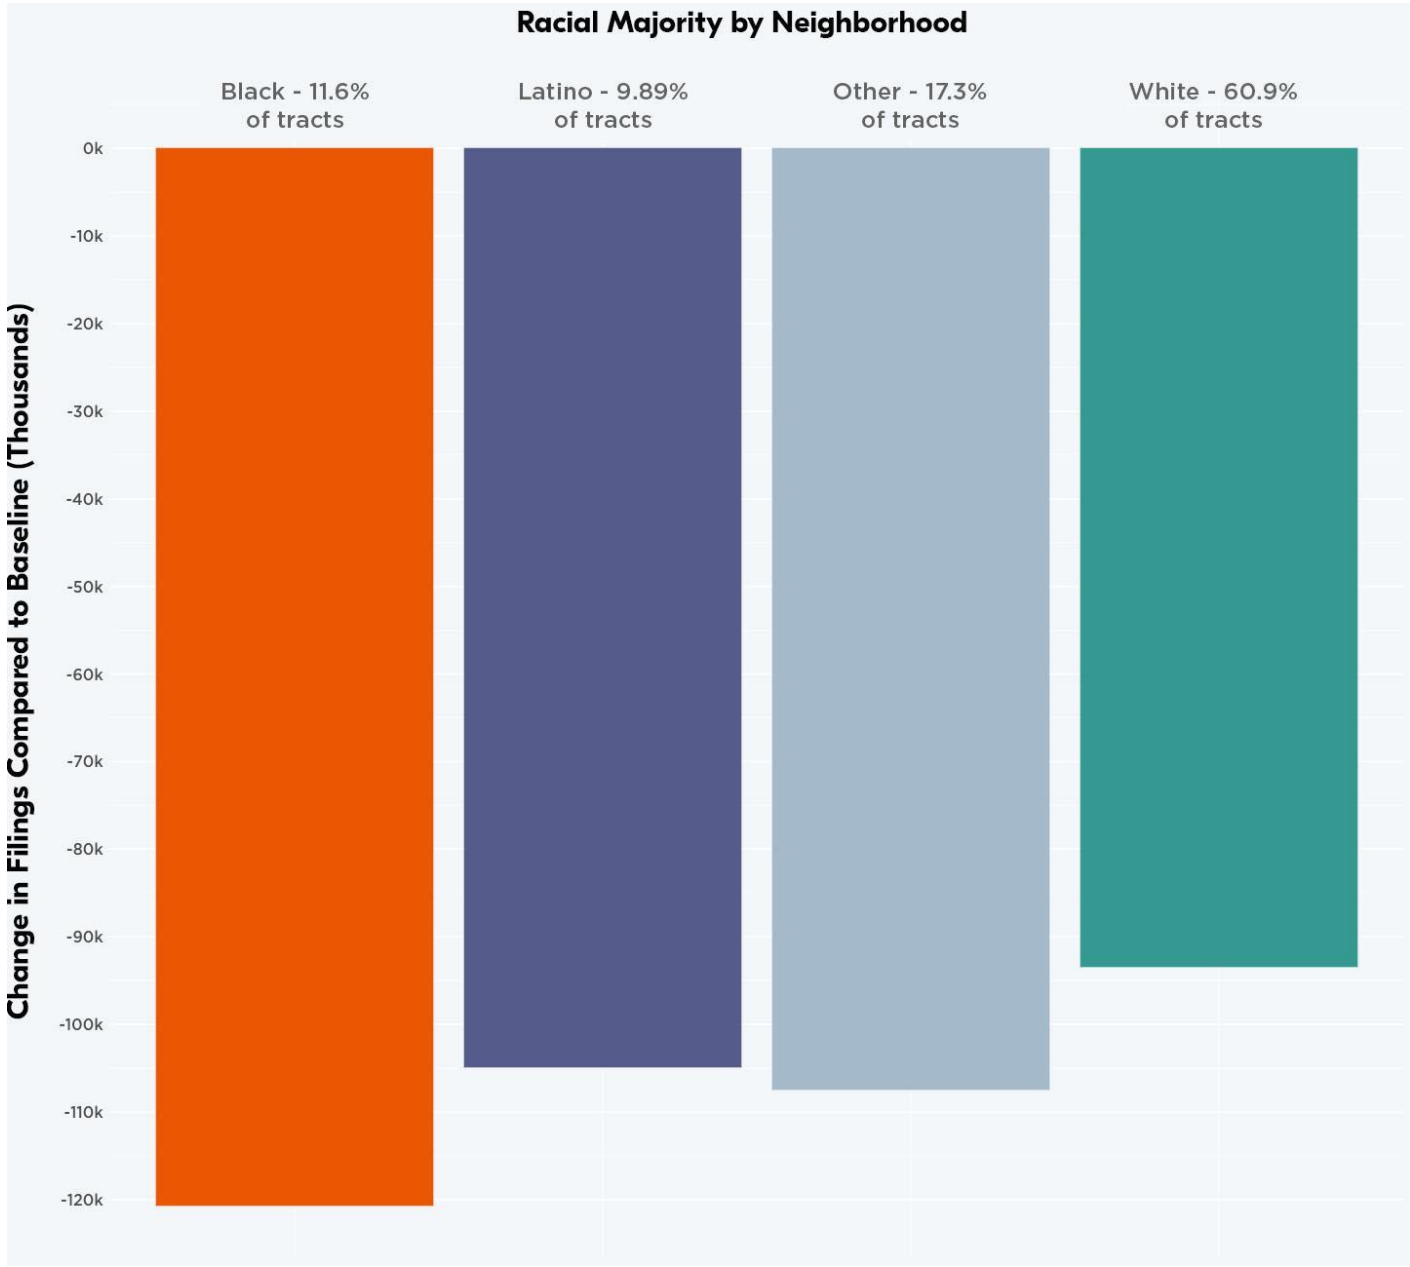

# Where you live matters for whether you're evicted

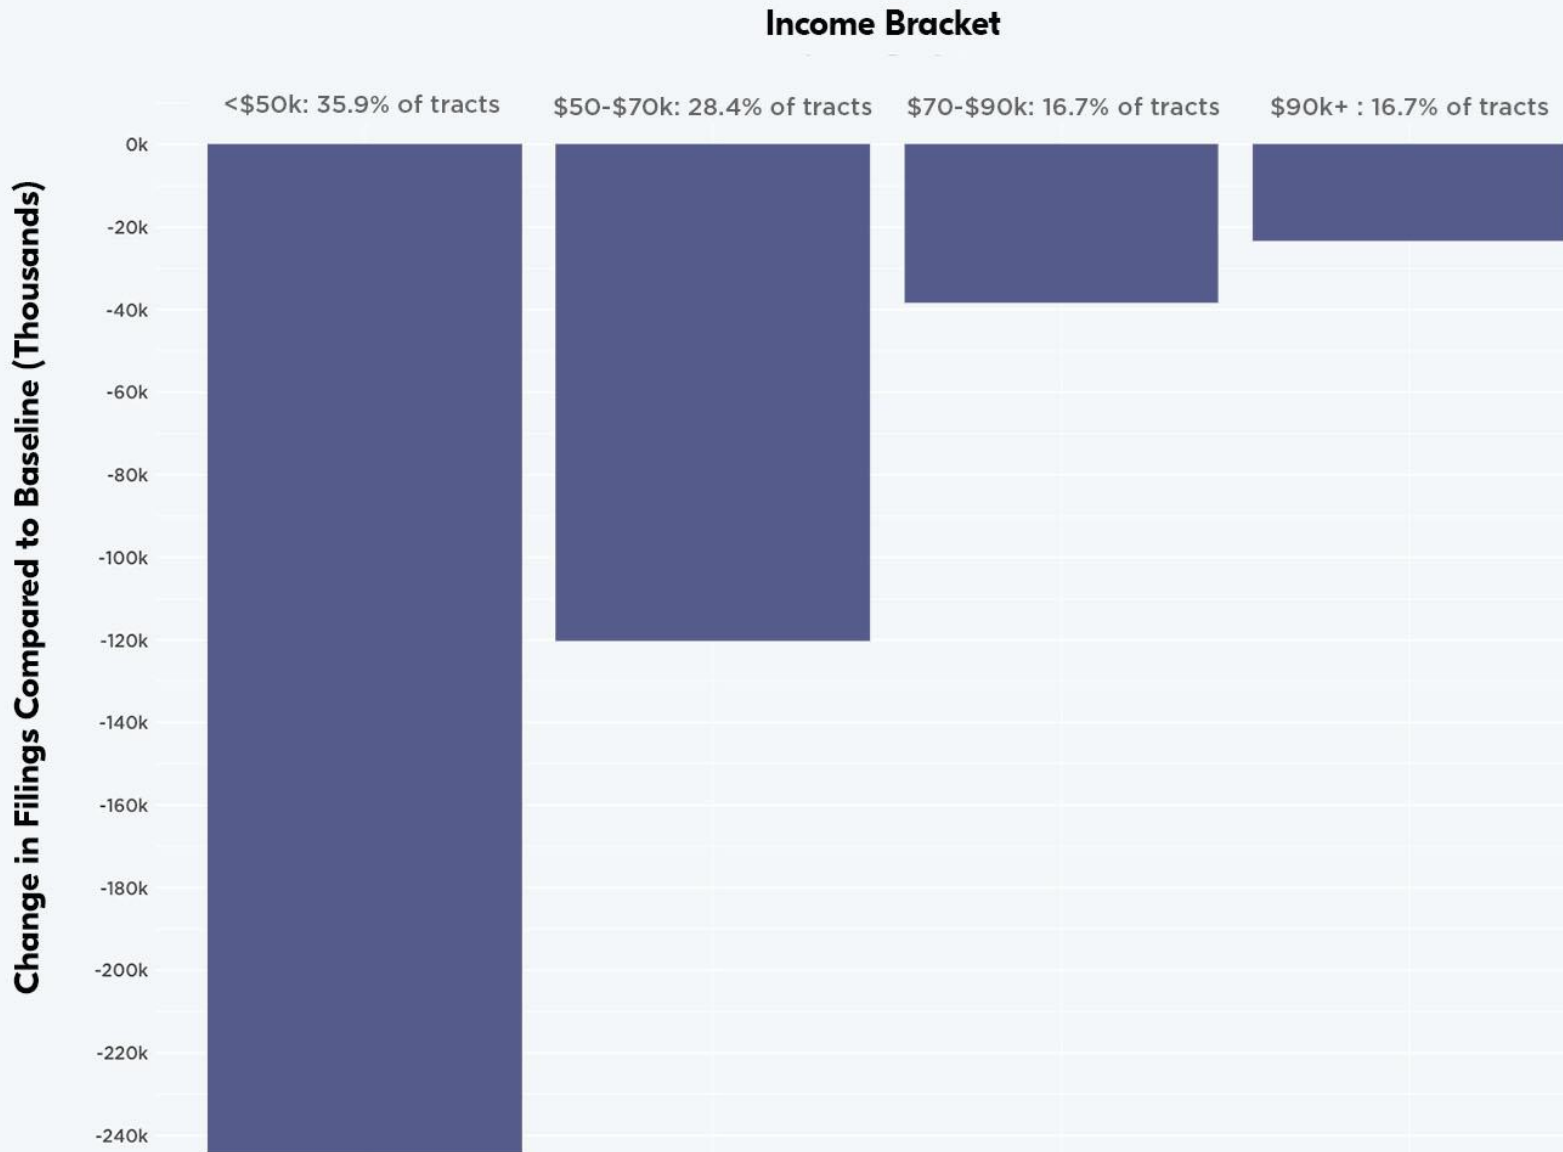

# Demographics of filings in 2021

# Greatest reductions in majority-Black neighborhoods

# Greatest reductions in lower-income neighborhoods

# Final thoughts

- Causal analysis: Which policies helped the most?
  - Why were the same policies more effective in certain areas?
- How to transition from emergency policies to long-term structural change?
  - HIP+NLIHC brief later this call
- In 2022, cases are rising across the country and some areas are returning to normal volume.

## Preliminary Analysis: Eviction Filing Patterns in 2021

Over the last two years, the federal government intervened in the eviction crisis in a serious and unprecedented way. Our data show that that intervention has paid off.

## Preliminary Analysis: Eviction Filing Trends After the CDC Moratorium Expiration

## Eviction Depressed Voter Turnout in the 2016 Presidential Election

## Eviction Diversion: Preventing Eviction Before Going to Court

## Preliminary Analysis: 11 months of the CDC Moratorium

## Questions and answers about evictions as the CDC moratorium ends

# 2021 AHAR Part 1: Results in Brief

2021 AHAR Part 1:  
Results in Brief  
October 2021

# AHAR Overview

## Annual Homeless Assessment Report to Congress (AHAR)

- Prepared by Abt Associates each year on behalf of HUD
- Nearly 400 communities participate each year
- AHAR has three data sources (see below)

### Point-in-Time Data

Point-in-Time (PIT)  
count

Housing Inventory  
Count (HIC)

### Year-Round Data

Longitudinal  
Systems Analysis  
(LSA)

# Point-in-Time (PIT) Background

## What is the PIT?

A count of all persons experiencing homelessness in a Continuum of Care (CoC) on a single night in the last 10 days of January.

## Who conducts the PIT?

CoCs - cities, counties, groups of counties, or states that receive HUD funding for homeless programs.

## How often is the PIT conducted?

CoCs are required to conduct a “sheltered” PIT count every year and an “unsheltered” count every other year (in odd years); many choose to conduct both counts annually. **Due to COVID-19, not all CoCs had to conduct an unsheltered PIT count in 2021.**

# Housing Inventory Count (HIC) Background

## **What is the HIC?**

A national inventory of beds for homeless (and formerly homeless) individuals and families. The HIC measures community capacity to house homeless people (and previously homeless people) on the night it performed its count.

## **Who conducts the HIC?**

CoCs - cities, counties, groups of counties, or states that receive HUD funding for homeless programs.

## **How often is the HIC conducted?**

CoCs are required each year to conduct a HIC during the last 10 days of January (on the same night as the PIT count).

## How is the 2021 AHAR different from prior years?

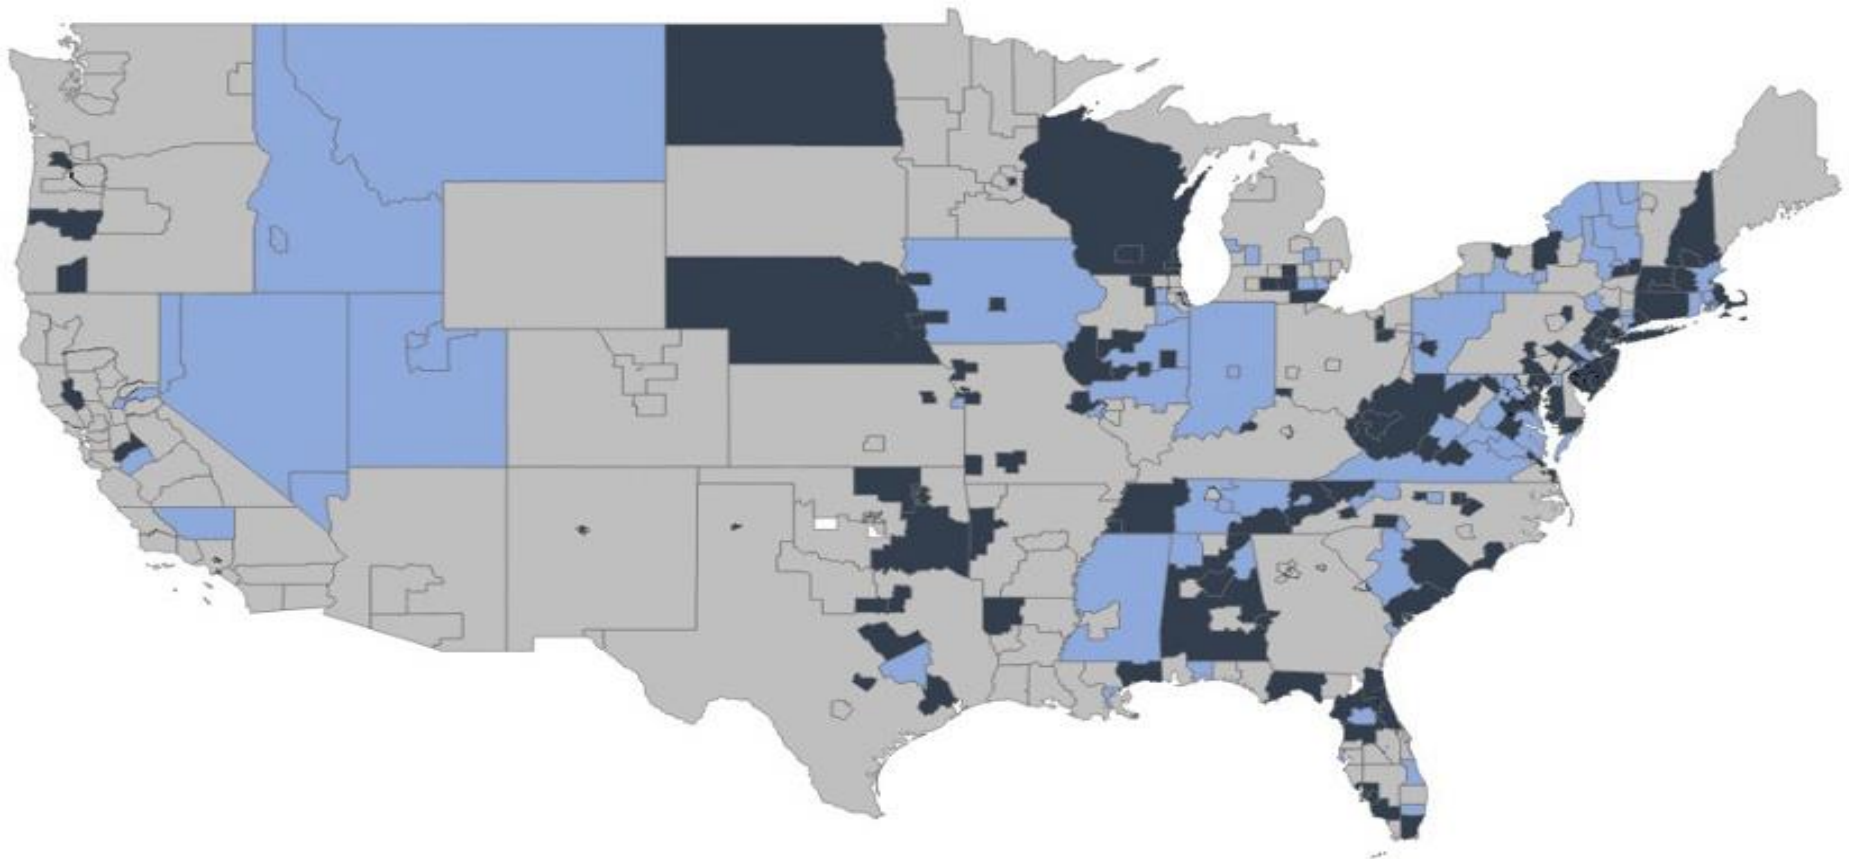

- Focuses primarily on sheltered homelessness across all populations
- Includes additional information throughout report on inventory and occupancy rates
- Provides more context than prior reports
- Includes qualitative review of narrative information provided by communities
- Appendix provides information on those communities that did conduct an unsheltered count

## Which CoCs Conducted Unsheltered Counts?

Count Type ● Full Unsheltered Count ● Partial Count ● Sheltered Only

## 2021 AHAR: Point-in-Time Topline Estimates

Population	2021 Estimate	Change 2020-2021 #	Change 2020-2021 %	Change 2007-2021 %
All People in Sheltered Programs	326,126	-28,260	-8%	-16.7%
Sheltered Individuals	194,749	-4,729	-2.4%	-8.6%
Sheltered People in Families with Children	131,377	-23,531	-15.2%	-26.3
Sheltered Unaccompanied Youth	15,763	-1,508	-8.7%	N/A
Sheltered Veterans	19,750	-2,298	-10.4%	-54.5%*
Sheltered Individuals with Chronic Patterns of Homelessness	44,346	7,235	19.5%	6.2%

## Overall capacity increased slightly

### Bed Inventory and Occupancy Rates by Bed Type

	Emergency Shelter Beds		
	2020	2021	Change
<b>Total ES Beds</b>	336,618	356,940	6.0%
<b>Facility-based beds</b>	304,561	303,174	-0.5%
<b>Other beds</b>	17,825	20,507	15.0%
<b>Voucher beds</b>	14,232	33,259	133.7%

# Occupancy rates declined

**Occupancy Rates of Programs for People in Sheltered Locations, 2020 and 2021**

	2020	2021
<b>Total</b>	82.1%	73.2%
<b>ES</b>	83.2%	73.7%
<b>SH</b>	85.9%	68.3%
<b>TH</b>	78.2%	71.5%

## Why did sheltered homelessness decline?

- Changes to shelter capacity to comply with social distancing requirements;
- Hesitancy in seeking shelter;
- Prioritizing Rapid Rehousing (RRH) and Permanent Supportive Housing (PSH); and
- Stemmed inflow into the homeless system
  - Eviction moratoria
  - CARES Act funding/Economic Impact Payments
  - Other homelessness prevention and shelter diversion efforts

## What else?

- Communities that conducted unsheltered counts in both 2020 and 2021 show no change in unsheltered numbers.
- The 210 communities that conducted at least a head count accounted for only 22% of the unsheltered population in 2020.
- Data suggest increased vulnerability of those who were sheltered in 2021
  - Increase in individuals with chronic patterns of homelessness
  - Increase in transgender and gender non-conforming unaccompanied youth and individuals
  - Increase in Native American unaccompanied youth and individuals;
  - First time since data collection began that PSH beds for CH declined.

**Claudia Aiken**

*Director*

Housing Initiative at Penn

[claudf@design.upenn.edu](mailto:claudf@design.upenn.edu)

# Emergency Rental Assistance (ERA) During the Pandemic: Implications for the Design of Permanent ERA Programs

THE HOUSING  
INITIATIVE  

---

at Penn

NATIONAL LOW INCOME  
HOUSING COALITION

# A Critical Moment

- *Some state & local Treasury ERA programs are no longer accepting applicants as **funding runs out***
- *The infrastructure & knowledge developed by these programs is at risk of **being lost***
- *As of February, 11 million renter households still had **low confidence** in their ability to pay rent*
- *Simply returning to the **status quo** means millions of renters will continue to live on the edge of severe housing instability*

*We have an opportunity to build on the lessons learned in ERA to stabilize renters going forward*

# Methods

Survey 1	Survey 2	Survey 3	Survey 4
August-October 2020	April 2021	July 2021	October-December 2021
220 Early ERA Programs	64 Treasury ERA1 Programs	105 Treasury ERA1 Programs	100 Treasury ERA1/ERA2 Programs

- Compare responses from **full sample** of administrators who responded to the 2020 and late 2021 surveys
- Focus on **28 programs** that completed both surveys
- Use final survey to understand **transition from ERA1 to ERA2**
- Use **retrospective question** in final survey to understand what aspects of their programs administrators would have changed given what they now know

# Challenges

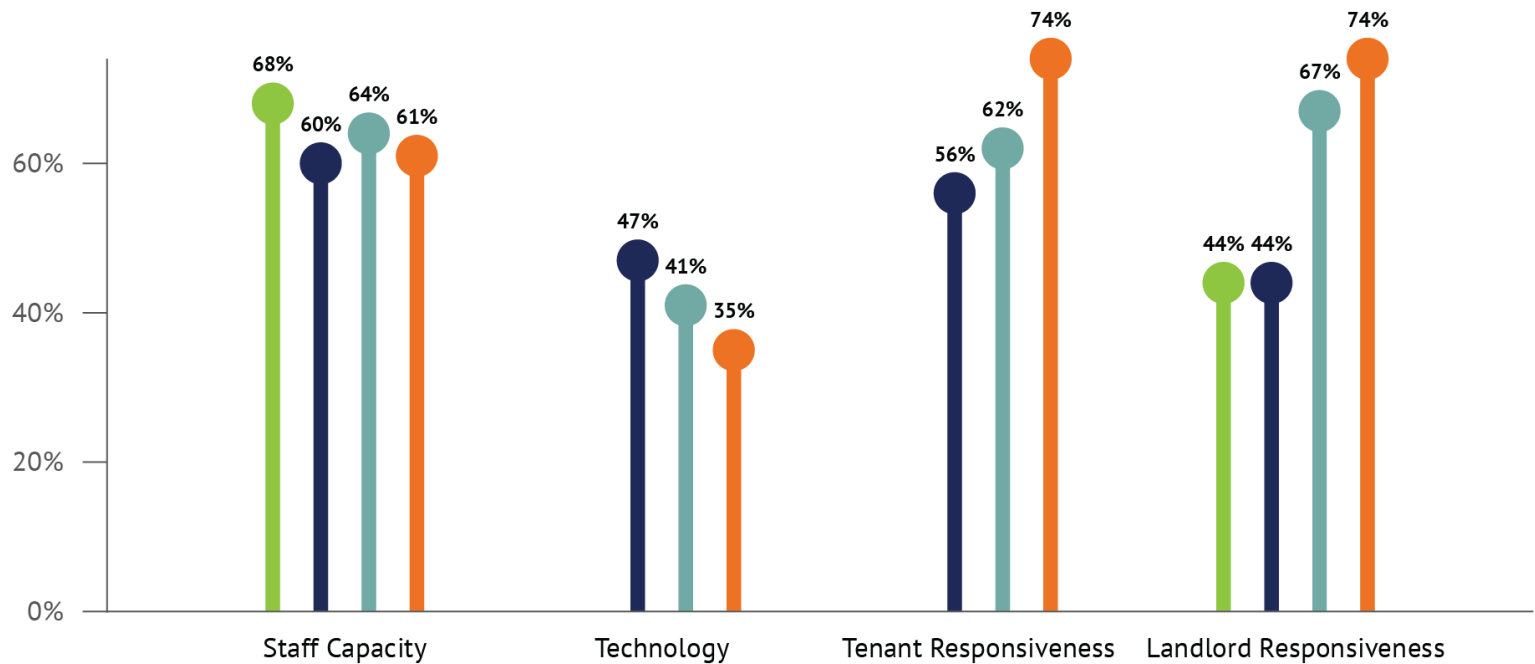

---

# Change in Challenges Over the Course of 2021 (Oct-Dec 2021, N=95)

# Common Challenges Faced by ERA Programs

● Aug-Oct 2020 (N = 139) ● April 2021 (N = 45) ● July 2021 (N = 39) ● Oct-Dec 2021 (N = 98)

# Key Strategies

---

# Building Capacity

- *More programs worked with nonprofits in 2021 than in 2020 (68%, N=163 to 81%, N=99); all but one program that had not worked with nonprofits in 2020 were doing so in 2021*
- *In retrospect, program admins wished they had partnered sooner, with a greater number of orgs, had assigned greater responsibility, or had coordinated better*
- *Several admins reported that they would have made different decisions around **staffing** in retrospect, and 27% would have invested in better **technology** from the start*

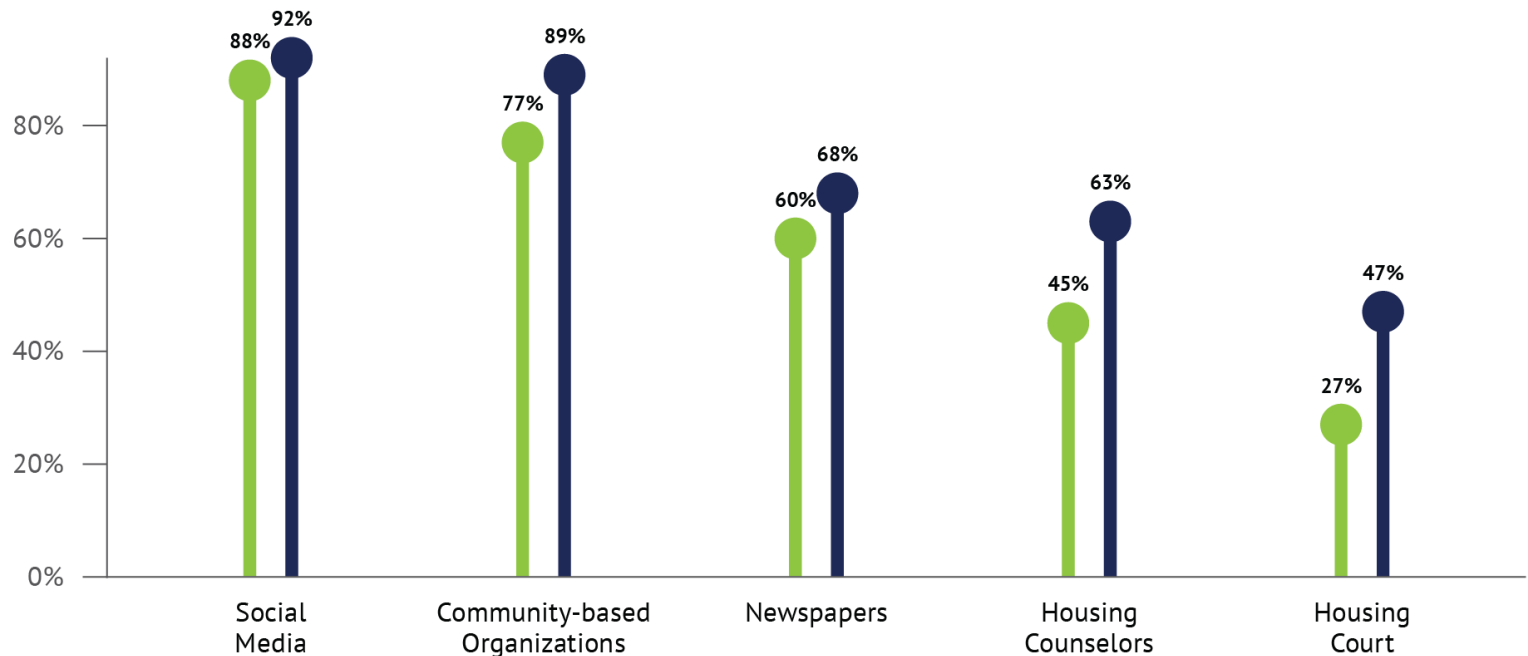

# Improving tenant responsiveness

- *Programs introduced flexible alternatives to source documentation, including:*
  - ***Self-attestation** of income (75%, N=53 in April; 81% N=99 by December 2021)*
  - ***Categorical eligibility** (71%, N=99 in late 2021) or **fact-specific proxies** (29%)*
- *ERA programs also adopted more **flexible definitions** of COVID-19-related hardship and **reduced** the number of documents required*
- *The transition to ERA2 further expanded these flexibilities*

# Improving tenant responsiveness

## OUTREACH STRATEGIES ADOPTED BY ERA PROGRAMS

● Early ERA Programs (Aug-Oct 2020, N = 163) ● Treasury ERA Programs (July 2021, N = 73)

# Addressing landlord responsiveness

- *Treasury ERA programs overwhelmingly continued to send payments to landlords, but by late 2021, many allowed **direct-to-tenant payment** in some capacity*
  - *71% allow direct-to-tenant payment if landlords didn't participate*
  - *7% assist tenants directly **without landlord participation***
- *The number and stringency of **landlord requirements** have shifted – increasing in some respects, decreasing in others*
- *Overall, they likely decreased. Of the 17 programs surveyed in 2020 and again in late 2021, all but one had decreased the number of landlord requirements*

# Implications for Future Policy

# Implications

- *There are **current proposals** to make ERA a more permanent component of our housing safety net, e.g., the bipartisan Eviction Crisis Act*
- *Future programs can **learn from** COVID-19 ERA programs*

*Sufficient and sustained funding*

*Flexibility in eligibility and documentation + targeted outreach*

*Direct-to-tenant assistance*

*Clear and timely program parameters*

# Responding to federal oversight

- *Treasury ERA program admins (18%, N=70) expressed frustration about **delayed** guidance from Treasury concerning reporting requirements and program design, or found the early guidance overly **restrictive***
- *Some program administrators have continually adapted their programs as guidance has evolved*
- *Over three-quarters (77%, N=84) planned to make at least one adjustment as they **transitioned** from ERA1 to ERA2, most often to increase the duration of assistance*

Report: <https://bit.ly/3vWgwri>

**Thank you!**

*The Annie E. Casey Foundation, the Charles and Lynn Schusterman Family Philanthropies, the JPB Foundation, the Robert Wood Johnson Foundation, and the Stoneleigh Foundation generously supported this research. We thank them for their support but acknowledge that the findings and conclusions presented in this report are those of the authors alone, and do not necessarily reflect the opinions of these funders.*

Housing Rights Committee of San  
Francisco

[brad@hrcsf.org](mailto:brad@hrcsf.org)

## Legal Requirements for Landlord to Meet With Tenants:

- First time in the country, a landlord whose tenants form a tenant association has the legal obligation to “meet and confer” with the tenant association
- This means that tenant associations can request a meeting, decide their own attendees and representatives (including non-resident advocates like HRCSF staff), raise issues to the landlord, and present proposals to resolve those issues
  - Landlord has the obligation to negotiate and, when requested, put agreements into writing with the association

## Organizing Activities Become Housing Services:

- For a building to form an association under this law, the tenants need to get a 50% + 1 majority of the occupied units in the building to sign a petition.
  - Not all tenants in an unit, just the leaseholder / primary tenant
- Once the tenant have the signatures, they need to send a copy of the petition to the landlord.
- If a landlord ignores the the request to meet with the tenant or interferes with outreach, the tenants could win rent reductions for all members of the association

# New Protection for Outreach:

- San Francisco tenants have had the right to flyer their own buildings, but now tenants have expanded rights to door-knock their own buildings, hold tenant meetings in common areas and in their units, and allow non-resident advocates to enter and do outreach in their buildings as well.
- Residents managers and landlords cannot interfere with this outreach nor can they tamper with posted flyers or pamphlets in common areas.

## If Landlord Violates These Rights and Protections:

- When the association requests a meeting with the landlord, and if the landlord refuses to meet or negotiate, the association can file a petition at the SF Rent Board for rent reductions
  - This applies to all “organizing activities,” including flyering, door-knocking, having tenant meetings, and inviting non-resident advocates into the building
