

Dear Multifamily Housing Partners,

There is a new federal subsidy program that can help your residents pay for internet service. The **Affordable Connectivity Program**, offered through many internet service providers, gives households \$30 a month to cover the cost of internet service and a one-time subsidy of \$100 for computer devices for eligible households. ACP is a \$14.2 billion program made possible by the Infrastructure Investment and Jobs Act.

Public housing and Section 8 residents are eligible for ACP funding based on their receiving housing assistance, and the ACP subsidy is not considered income. To date, public housing residents are under-enrolled in the ACP program. We encourage you to make residents aware of this subsidy as it would increase their internet connectivity without added expense.

To assist with this, we have developed a [Mini-Guide to the ACP](#) to help staff conduct outreach and enrollment events.

- An overview of the program
- Tips and best practices from two PHAs that are actively enrolling residents in ACP
- Links to additional materials, including informational flyers in a variety of languages.

We hope you will make use of this resource to help your residents connect to this invaluable benefit. For more information, view the ACP [Fact Sheet](#) and read the [Press Release](#).

If we can be of assistance, please contact connecthome@hud.gov.

A child is seen from the side, sitting at a desk and using a laptop. The laptop screen displays a colorful flowchart or diagram. In the background, there are other desks and a robot on a desk, suggesting a classroom or computer lab environment.

Affordable Connectivity Program
*Helping Households Get
Access to Broadband*

The Affordable Connectivity Program is an FCC benefit program that Congress created to help ensure that households can afford the broadband they need for work, school, healthcare and more.
