November 13, 2017

The Honorable Mitch McConnell
Majority Leader
U.S. Senate
Washington, DC 20515

The Honorable Paul Ryan
Speaker of the House
U.S. House of Representatives
Washington, DC 20515

Dear Majority Leader McConnell and Speaker Ryan:

We, the undersigned 2,500 organizations, state and local governments, and elected officials, urge you to redirect any savings derived from reforming the mortgage interest deduction into rental housing programs that serve the lowest income families and individuals, like the national Housing Trust Fund or a renters' tax credit.

Our nation is in the midst of an affordable housing crisis. Growing demand for rental housing has resulted in higher rents. More families than ever before struggle to pay their rent each month, and every Congressional district and state across the nation is impacted. Yet, despite the need, federal investments that reduce homelessness and housing poverty are sorely underfunded: Just one in four low income families eligible for federal housing assistance receives the help they need.

Comprehensive tax reform provides one of the best opportunities to end homelessness and housing poverty once and for all. As Congress considers comprehensive tax reform legislation, we urge you to seize this opportunity by reinvesting any savings derived from changes to the mortgage interest deduction into rental housing solutions for people with the greatest needs – not to offset the cost of tax breaks for the wealthy and corporations.

In doing so, we can make the critical investments that our nation needs to help America's families, our local communities, and our national economy thrive. We know the key to reducing poverty and increasing economic mobility is access to safe and affordable homes. Increasing access to affordable homes bolsters child and family success, economic growth, wages, and productivity. And each dollar invested in developing and preserving affordable homes boosts local economies by leveraging public and private resources to generate income—including resident earnings and additional local tax revenue—and supports job creation and retention.

Using housing dollars to offset the cost of lowering taxes for the wealthy and corporations is a non-starter. Instead, our nation should be reinvesting these housing dollars into deeply targeted programs that serve people with the most acute housing needs.

Sincerely,
